No Scrap Left Behind Teralyn Pilgrim, 2024-09-17 The story of a mother's quest to end her family's food waste and all the blunders that came with it Teralyn Pilgrim had no idea the environmental and economic impact of food waste or that she could save 100 a month by being waste free But when a story of hungry children fills her with unbearable guilt she decided to make a change to the way her family approached mealtime Despite finicky kids and a skeptical husband Pilgrim turned her feelings of guilt into action and created a zero food waste kitchen Pilgrim began her journey by defining food waste with Rule 1 the Hungry Kid Test would you throw something edible away with a hungry child watching If the answer is yes it can go in the compost If the answer is no then it's time to get creative Narrating her trials and errors emphasis on errors Pilgrim invites readers to her table where leftover food is a personal challenge to reduce waste save money and guard against squandering natural resources Things get tricky when she discovers a five year old fish in her freezer accidentally buys the grossest fat free cookies in the world and finds her dog is as picky as the kids Addressing myths about how being waste free is too hard it's not and whether expiration dates mean anything they don't Pilgrim teaches readers clever ways to be resourceful while also offering a broader look at why food waste matters and the global effects of this massive problem Both a resource for families and a call for worldwide change No Scrap Left Behind offers nine step program and hundreds of food related tips to help readers find their own way to sustainable living trim the grocery bill and effect change starting in their own kitchens

**Encyclopedia of Consumption and Waste** Carl A. Zimring, William L. Rathje, Consulting Editor, 2012-02-27 Archaeologists and anthropologists have long studied artifacts of refuse from the distant past as a portal into ancient civilizations but examining what we throw away today tells a story in real time and becomes an important and useful tool for academic study Trash is studied by behavioral scientists who use data compiled from the exploration of dumpsters to better understand our modern society and culture Why does the average American household send 470 pounds of uneaten food to the garbage can on an annual basis How do different societies around the world cope with their garbage in these troubled environmental times How does our trash give insight into our attitudes about gender class religion and art The Encyclopedia of Consumption and Waste explores the topic across multiple disciplines within the social sciences and ranges further to include business consumerism environmentalism and marketing to comprise an outstanding reference for academic and public libraries
