

Somewhere in the naked city lurks
a one-armed, one-legged, one-eyed man
responsible for the murder for which Ryan Harrison
has been wrongfully accused.
To find him, all Ryan needs is a clue.

A photograph of Leslie Nielsen sitting in a yellow train car. He is wearing a brown jacket over a yellow shirt and blue jeans. He has a white cast on his right arm and is wearing white gloves. The train car has the number '6408' on it. The background is a blurred cityscape.

Medical Negligence: Non-Patient and Third Party Claims Rachael Mulheron,2016-04-29

Healthcare professionals face an increasing threat of litigation from parties whom they have never met in their daily medical practice and who look nothing like the traditional patient The so called non patient may take many forms for example a person who is injured or killed by a mentally ill physically disabled or diseased patient a wrongfully accused parent in a child neglect abuse case or a local authority which is put to the expense of caring for a negligently treated patient This book explores the legal principles and conundrums which arise when determining a healthcare professional s liability in negligence towards a wide variety of non patients The topic is assuming increasing legal importance and relevance given the potential for many non patient claims to give rise to class actions litigation and in light of the legislative and human rights interventions and the frequent appellate judicial consideration which non patient claims have attracted in recent times The aim of the book is to have utility for both legal and medical professionals for academics and students of comparative medical negligence and tort law and for law reformers who may be interested in adopting certain features of statutory models elsewhere which pertain to some non patient claims such as those based upon Good Samaritan conduct Important parallels or counterpoints from other common law jurisdictions in which courts and commentators have grappled with the legal complexities of non patient claims are also discussed and critically analyzed

Industry 5.0 and Paradigm Shift—Emerging Challenges Namit Gupta,Roopa Shinde,Rakesh Kumar Malviya,Anjali Gupta,2023-01-23

Industry 5 0 is the successor of the Industry 4 0 concept which employed high technology in the manufacturing industry Industry 5 0 is a

new idea that adds a human touch to the work of robots and smart machines The basic idea of humans and machines working together is to increase efficiency and effectivity like the Internet of things IoT It aims to merge the increasing cognitive computing abilities of the robots with the intelligence and resourcefulness of the humans The progress of Industry 5 0 is inevitable As the technology grows more each day we find ways to make our work simpler The development of such technologies to make the world more efficient requires its manufacturers i e humans who collaborate with these machines and technologies Humans are indispensable resources as what a machine can do is limited And with all these efficiencies we have come so far there is no path leading us back With adoption of new concepts comes a paradigm shift as development continues and we move from Industry 4 0 which speaks of the future of production its primary purpose continues to be achieving seamless connectivity between machines and IT systems for higher productivity and efficiencies across the value chain Overall it focuses mainly on traditional financial and operational KPIs Whereas Industry 5 0 gives a human touch to the concept of 4 0 keeping in mind the well being of the environment and society making the machines and humans work together on a path of Green Future Industry 5 0 has the balance of both humans and technologies which benefits the ecosystem with discovery of new energy sources and renewable resources helping in a sustainable working environment It can be used to reduce harmful residue caused due to manufacturing processes and recycle rare materials Taking this theme the multidisciplinary congress on Industry 5 0 and Paradigm Shift Emerging Challenges will highlight research challenges and open issues that should be further developed to realize Industry 5 0
