X Ray Background:

Variability of the Unresolved X-Ray Background Elizabeth Post, 2019 The cosmic x ray background is diffuse uniform x ray radiation originating from outside our galaxy Over the past several decades since its discovery much of it has been resolved into discrete sources However a fraction of the x ray background still remains unresolved This remaining fraction is composed of sources from the very early universe and high energy processes from this time period have major impacts on the modern universe We cannot observe these sources directly but we can observe how the unresolved x ray background varies over time Sources such as active galactic nuclei are known to have variable fluctuations in brightness while galaxies do not so by measuring the variability in brightness of individual x ray background pixels over time we can infer whether or not it is comprised of mostly active galactic nuclei or galaxies We analyze x ray images of the same area of sky taken at different points in time and measure the standard deviation of individual pixels in order to measure how they vary in brightness over time We compare this to a mock dataset generated using the average pixel value of our experimental dataset following a random Poisson distribution that simulates a non variable x ray background Our results indicate that the unresolved cosmic x ray background is not variable thus we infer that it is most likely primarily due to galaxies from the very early universe This has significant cosmological implications because these are likely to be x rays radiated from the very first generation of stars Studying the unresolved cosmic x ray background provides insight into what sort of high energy processes occurred in the early universe and how those processes shaped the universe that we observe today *The X-ray Background* Xavier Barcons, Andrew C. Fabian, 1992-07-31 A review of the current observational knowledge and understanding of the cosmic X ray background Particle Physics And Cosmology - Proceedings Of The Ninth Lake Louise Winter Institute D Page, 1995-02-22 This volume explores the recent trends in particle physics and cosmology The invited lecturers include D Caldwell A Linde A B MacDonald J Peebles K Rolfs and D Schramm **Scientific and Technical Aerospace Reports** ,1990 Extra-galactic X-ray Sources and the Diffuse X-ray Background Chris R.
