*Socratic Perplexity and the Nature of Philosophy* Gareth B. Matthews, 2003 Gareth Matthews suggests that we can better understand the nature of philosophical inquiry if we recognize the central role played by perplexity The seminal representation of philosophical perplexity is in Plato's dialogues Matthews invites us to view this as a response to something inherently problematic in the basic notions that philosophy deals with He examines the intriguing shifts in Plato's attitude to perplexity and suggests that this development may be seen as an archetypal pattern that philosophers follow even today So it is that one may be won over to philosophy in the first place by the example of a Socratic teacher who displays an uncanny gift at getting one perplexed about something one thought one understood perfectly well Later however wanting like Plato to move beyond perplexity to produce philosophical results one may be chagrined to discover that one's very best attempt to develop a philosophical theory induces its own perplexity Then like late Plato and like Aristotle the philosopher may seek to normalize perplexity in a way that both allows for progress and yet respects the peculiarly baffling character of philosophical questions

**From Puzzles to Principles?** May Sim, 1999-01-01 Scholars of classical philosophy have long disputed whether Aristotle was a dialectical thinker Most agree that Aristotle contrasts dialectical reasoning with demonstrative reasoning where the former reasons from generally accepted opinions and the latter reasons from the true and primary Starting with a grasp on truth demonstration never relinquishes it Starting with opinion how could dialectical reasoning ever reach truth much less the truth about first principles Is dialectic then an exercise that reiterates the prejudices of one's times and at best allows one to persuade others by appealing to these prejudices or is it the royal road to first principles and philosophical wisdom In *From Puzzles to Principles* May Sim gathers experts to argue both these positions and offer a variety of interpretive possibilities The contributors' thoughtful reflections on the nature and limits of dialectic should play a crucial role in Aristotelian scholarship

**Tao and Trinity: Notes on Self-Reference and the Unity of Opposites in Philosophy** S. Austin, 2014-11-21 The Chinese Tao and the Western Trinity have a fundamental unity of theme the unity of opposites Both are connected with problems as broad and diverse as how to describe the entire universe how a system can talk about itself the relationship between symbols and realities and the nature of signs and sacraments

**The Quest for Excellence** Dustin Gish, Chris Constan, J. Scott Lee, 2016-08-25 Liberal education aspires to excellence through the cultivation of free human beings who excel in thought word and deed But what exactly is excellence and why do we admire it How do we conceive of what is excellent What constitutes excellence either for human beings or in the realms of philosophy literature science and politics Why is excellence an aim of liberal education What kinds of texts courses and inquiries contribute to achieving this end Such questions animate the studies herein The essays in this volume reflect on the idea of excellence embedded within core texts as well as how such texts influence and ennoble higher education In its chapters we consider rival forms of excellence from ancient Greece and Rome through modern Europe and America and beyond The world of antiquity and its

accounts of excellence as represented in the works of Euripides Aristotle Plato Archimedes and Cicero are here brought into dialogue with diverse modern perspectives on excellence as articulated by Shakespeare Descartes Newton Locke Rousseau Kant Austen Darwin Lincoln Tennyson and Nietzsche as well as more recently by John Dewey Martin Luther King Jr Cardinal Newman and Eboo Patel Our desire to seek and understand excellence transcends borders and the purpose of this volume is to help perpetuate in contemporary higher education the study of core texts essential to the cultivation of excellence in the liberal arts and sciences
