Four Stories of the Schrodinger's Cat Murat Ukray,2024-11-24 She is both dead and alive according to some left brains But I want to give you the story of what we can learn from this for everyday life and for our work with the daily nature philosophical system As you know I was the first that told the world that all the new systems that give themselves very good sounding names like Quantum worlds theories or Nonlinear or Discrete physics systems are all random number generators including Now what is missing in our culture is an appreciation for the Uncertain but that this will be the foundation of a new science and that is what we are doing here For about one hundred years the uncertainty principle has been reconfirmed in hundreds of experiments which simply says you cannot measure all parameters like coordinates impulse and so on of atomic particles with any desired accuracy but that there is a limit given by the Heisenberg formula Why has such a tiny matter kept so many

brains spinning for such a long time what is in question here are quantities in the range of 1 billions of a meter and 1 billions of a second so who and why care We all know or should know that uncertainty is a common factor in our life and we try to escape it with so much pretense and insurances This is why the discovery that uncertainty is even part of the most simple processes is making so much wind for such a long time And of course there are those simple minds like Einstein who hold that the Uncertainty principle is only the result of the fact that we do not know all the details he called them the hidden Parameters and once we know them voila no more uncertainty all is calculatable down to the last digit Simply our common hope believe imagination that at the basis there is a really real reality that is unmistakable one way or the other The cat is either alive or dead I don t want to bore you with the over and over told stories of the wave particle duality and Schroedinger s cat May be there are hundreds of books that do this But I tell you a different and deeply story so relation to the paralel universe that contain from ancient Upanishads to modern String theory and beyond with simply forming Four Equations and Four Stories

A Social & Industrial History of England, 1815-1918 James Frederick Rees,1925 **Fifty Famous Stories Retold** James Baldwin,2024-11-24 THERE are numerous time honored stories which have become so incorporated into the literature and thought of our race that a knowledge of them is an indispensible part of one s education These stories are of several different classes To one class belong the popular fairy tales which have delighted untold generations of children and will continue to delight them to the end of time To another class belong the limited number of fables that have come down to us through many channels from hoar antiquity To a third belong the charming stories of olden times that are derived from the literatures of ancient peoples such as the Greeks and the Hebrews A fourth class includes the half legendary tales of a distinctly later origin which have for their subjects certain romantic episodes in the lives of well known heroes and famous men or in the history of a people It is to this last class that

most of the fifty stories contained in the present volume belong As a matter of course some of these stories are better known and therefore more famous than others Some have a slight historical value some are useful as giving point to certain great moral truths others are products solely of the fancy and are intended only to amuse Some are derived from very ancient sources and are current in the literature of many lands some have come to us through the ballads and folk tales of the English people

Mother Stories Maud Lindsay, 2024-11-23 Mother a Story at the right time Is a Looking glass for the Mind Froebel Endeavored to write for mothers and dear little children a few simple stories embodying some of the truths of Froebel s Mother Play The Mother Play is such a vast treasure house of Truth that each one who seeks among its stores may bring to light some gem and though perhaps I have missed its diamonds and rubies I trust my string of pearls may find acceptance with some mother who is trying to live with her children I have written my own mottoes with a few exceptions that I might emphasize the particular lesson which I endeavor to teach in the story for every motto in the Mother Play comprehends so much that it is impossible to use the whole for a single subject From The Bridge for instance which is replete with lessons I have taken only one for the story of the Little Traveler

Fairy Stories and Fables James Baldwin, Arthur Rackham, 2024-11-24 The longer stories in this book are called Fairy Stories because that is the name by which such tales are always known to children and yet only a very few contain any direct reference to fairies The most of them have to do with talking animals and with strange incidents and transformations such as have always delighted the childish fancy They have been drawn from a variety of sources and liberty has been taken to make such changes in the narratives as seemed most necessary to adapt them to the understanding and needs of the children of our own time and country Free renderings they may be called of some of the most popular folktales of foreign lands The Three Bears Tom Thumb Jack and the Beanstalk and Tom Tit Tot are old English favorites dressed in modern garb Little Red Riding Hood Puss in Boots Princet and the Golden Blackbird and Drakesbill and his Friends are variants of the well known French versions by Perrault Marelles and Sebillot Little Tuppen and The Three Goats named Bruse are from Norwegian sources and the rest are founded upon German originals In the retelling of these tales care has been taken to avoid whatever might distress the most sensitive child as well as everything that could give a wrong bias to his moral nature or distort his perception of the beautiful and the true
