Strange Currencies:

The Social Life of Money Nigel Dodd, 2016-02-09 A reevaluation of what money is and what it might be Questions about the nature of money have gained a new urgency in the aftermath of the global financial crisis Even as many people have less of it there are more forms and systems of money from local currencies and social lending to mobile money and Bitcoin Yet our understanding of what money is and what it might be hasn't kept pace In The Social Life of Money Nigel Dodd one of today's leading sociologists of money reformulates the theory of the subject for a postcrisis world in which new kinds of money are proliferating What counts as legitimate action by central banks that issue currency and set policy What underpins the right of nongovernmental actors to create new currencies And how might new forms of money surpass or subvert government sanctioned currencies To answer such questions The Social Life of Money takes a fresh and wide ranging look at modern theories of money One of the book's central concerns is how money can be wrested from the domination and mismanagement of banks and governments and restored to its fundamental position as the claim upon society described by Georg Simmel But rather than advancing yet another critique of the state based monetary system The Social Life of Money draws out the utopian aspects of money and the ways in which its transformation could in turn transform society politics and economics The book also identifies the contributions of thinkers who have not previously been thought of as monetary theorists including Nietzsche Benjamin Bataille Deleuze and Guattari Baudrillard Derrida and Hardt and Negri The result provides new ways of thinking about money that seek not only to understand it but to change it

Magic Science Religion Ira Livingston, 2018-01-09 Magic Science Religion explores surprising intersections among the three meaning making and world making practices named in the title Through colorful examples the book reveals circuitous ways that social cultural and natural systems connect enabling real kinds of magic to operate Among the many case studies are accounts of how an eighteenth century actor gave his audience goosebumps how painters poets and pool sharks use nonlinearity in working their magics how the first vertebrates gained consciousness how plants fine tuned human color vision and the necessarily magical element of activism that builds on the conviction that another future is possible while working to push self fulfilling prophecy into political action
