

Strategic Economics: The Framework for Economic Power, Fiscal Sovereignty, and Financial Intelligence

By: Irvan Karamy

Acknowledgments

The author would like to thank Mr. Harry Basbasm, former Senior Deputy Director of Bank Indonesia, for his critical feedback, strategic insights, and editorial input during the development of this white paper. His thoughtful engagement and deep understanding of fiscal and monetary issues helped shape this work into a more grounded and actionable strategic framework.

Abstract

For centuries, economic theory has been built on assumptions that no longer hold in today's world. Traditional economic models assume equilibrium, rational decision-making, and the neutrality of money. However, history, geopolitics, and financial markets prove otherwise. This paper introduces Strategic Economics, a new framework that integrates economic growth, fiscal discipline, geopolitical power, and financial intelligence into a unified system. Unlike mainstream economics, which isolates financial variables, Strategic Economics recognizes that money is a tool of power, debt is a strategic weapon, and national sovereignty depends on fiscal sustainability. We outline how Ferguson's Rule serves as an indicator of national decline, why credit allocation is more important than money supply, and how governments can use economic strategy to maintain financial independence.

Executive Summary

Strategic Economics introduces a bold new framework that connects economics with power, policy, and national survival. Traditional models—rooted in 250-year-old assumptions—fail to address the realities of modern geopolitical and financial dynamics. They view interest rates, inflation, and growth as isolated variables, ignoring how credit flows, debt levels, and strategic control shape a nation's fate. This paper presents three core insights: (1) Credit allocation, not low interest rates, is the true driver of real growth; (2) Fiscal discipline is national sovereignty, as demonstrated by Ferguson's Rule—when interest payments exceed defense budgets, empires collapse; (3) Economics, politics, and power are one system, where financial flows determine global influence. Case studies from the U.S., China, and Indonesia reveal how mismanaged debt or strategic credit can either erode or enhance national resilience. The paper argues that Indonesia must embrace reforms like *Danantara* and targeted austerity—not just to balance the budget, but to survive the shifting global order. Strategic Economics is not an academic concept. It is a practical framework designed for policymakers, investors, and strategists who understand one truth: economic independence is power—and it must be built deliberately.
