The Concept of Social Structure Douglas Porpora, 1987 Porpora is concerned with the concept of social structure and with the relationship between social structure and the individual He focuses on two different conceptions of social structure the Durkheimian conception which is the dominant way in which social structure is conceptualized by sociologists and an alternative conception based on a reading of Marx The author discusses in depth the various aspects of these two divergent theories and shows how the Marxian conception of social structure underlies even the newer structural analyses of racism sexism and power that go beyond Marxian theory He offers a sustained critique of Structural Sociology's theoretical elimination of the individual actor which results in a corresponding elimination of any form of agency from the explanation of social structural processes

Social Structures John Levi Martin, 2009-08-16 Social Structures is a book that examines how

structural forms spontaneously arise from social relationships Offering major insights into the building blocks of social life it identifies which locally emergent structures have the capacity to grow into larger ones and shows how structural tendencies associated with smaller structures shape and constrain patterns of larger structures The book then investigates the role such structures have played in the emergence of the modern nation state Bringing together the latest findings in sociology anthropology political science and history John Levi Martin traces how sets of interpersonal relationships become ordered in different ways to form structures He looks at a range of social structures from smaller ones like families and street gangs to larger ones such as communes and ultimately nation states He finds that the relationships best suited to forming larger structures are those that thrive in conditions of inequality that are incomplete and as sparse as possible and thereby avoid the problem of completion in which interacting members are required to establish too many relationships and that abhor transitivity rather than assuming it Social Structures argues that these patronage relationships which often serve as means of loose coordination in the absence of strong states are nevertheless the scaffolding of the social structures most distinctive to the modern state namely the command army and the political party

Essentials of Sociology Robert Hagedorn,1983 *Studies in Structural Sociology* First W Young,2015-05-01 This collection of articles and essays embodies a new approach to sociology based on the original meaning of the word Its central concept is community which is defined to cover units as small as the household and as large as the nation state Individuals are a special case of community So defined communities account for almost all the independent social organization of the planet At every level communities must deal with unpredictable threats from nature other communities and internal conflict Success in this effort as measured by indicators of average health depends on the activation of a range of problem solving strategies applying specialized knowledge and skills debating the merits of conflicting courses of action and if these fail mobilizing behind a reform movement If a threat is overwhelming the community may revert to an earlier partly mythical way of life The ratio of problem solving capacity to threat determines the chances of success This perspective reflects the neo Durkheimian social ecology that sociologists at the University of Chicago pioneered at the beginning of the 20th century and it rejects the individual in society framework that guides most of contemporary sociology As presented in these articles and essays it offers alternative explanations for current findings on the negative impact of corporate production income inequality and the Islamic Counter Reformation among other well known problems Frank W Young is emeritus professor of Development Sociology at Cornell University where he taught for thirty three years He completed his PhD in Anthropology at Cornell in 1957 and returned to Cornell after fieldwork via the Department of Development Sociology His fieldwork began in Nova Scotia where he studied the impact of urbanization on two fishing villages This study was followed by similar comparative research in Mexico Puerto Rico Tunisia and the Southern Tier region of New York State In 1968 he spent a year at the Center for Advanced Studies in the Behavioral Sciences and in 1975 he was a senior fellow at the East West Center

Explorations in Structural Analysis (RLE Social Theory) Ronald Breiger, 2014-08-21 At a time when most of the innovative techniques in empirical sociology concern themselves with networks of relations among variables such as indices of occupational prestige education and income the central theme of this volume is that there is much substantive insight and analytical leverage to be gained from a conceptualization of social structure directly as regularities in the patterning of relations among concrete entities The view adopted here is that variate distributions measure selected consequences of structural pattern of the actual connections among individuals or organizations and as such they are useful indicators of questions to be asked in analyzing social structures directly but they are neither descriptions nor analyses of the structure itself
