Structures in Science Theo A.F. Kuipers, 2012-12-06 Although there is an abundance of highly specialized monographs learned collections and general introductions to the philosophy of science only a few 25 years synthetic monographs and advanced textbooks have appeared in the last The philosophy of science seems to have lost its self confidence The main reason for such a loss is that the traditional analytical logical empiricist approaches to the philosophy of science had to make a number of concessions especially in response to the work of Popper Kuhn and Lakatos With *Structures in Science* I intend to present both a synthetic monograph and an advanced textbook that accommodates and integrates the insight of these philosophers in what I like to call a neo classical approach The resulting monograph elaborates several important topics from one or more perspectives by distinguishing various kinds of research programs and various ways of explaining and reducing laws and concepts and by summarizing an integrated explication presented in *From Instrumentalism to Constructive Realism* ICR of the notions of confirmation empirical progress and truth approximation Memoirs of the National Academy of Sciences, 1911 Each volume comprises one or more monographs many of which are issued also as separate MEMOIRS OF THE NATIONAL ACADEMY OF SCIENCES: VOL.
