*Social Transformations in Archaeology* Kristian Kristiansen, Michael Rowlands, 2005-10-05 Social Transformations in Archaeology explores the relevance of archaeology to the study of long term change and to the understanding of our contemporary world The articles are divided into broader theoretical issues post colonial issues in a wide range of contexts archaeological examination of colonialism with case studies from the Mediterranean in the first millenium BC and historical Africa

*Complexity and Co-evolution* Elizabeth Garnsey, James McGlade, 2006-01-01 in my opinion readers should find in this book both several remarkable insights concerning basic statements of evolutionary theorising and concrete results that can be acquired by applying such basic statements in computer simulation models and in various fields of analysis Mauro Lombardi The Journal of Artificial Societies and Social Simulation Complexity theory first emerged three decades or so ago but only recently has its potential relevance for the study of social and economic phenomena really begun to be recognised This timely collection of essays clearly demonstrates both conceptually and empirically how complexity theory ideas can provide considerable insight into how socio economic systems cities societies industries technologies and economies evolve and adapt over time It is essential reading for anyone interested in how order and evolution emerge out of the seemingly chaotic socio economic world around us Ron Martin University of Cambridge UK I read Complexity and Co Evolution with real pleasure These authors have done the near impossible they have made the concepts of a new and evolving science accessible to people who can apply it in practical ways The clarity of writing reflects the sort of confidence only the truly informed can muster for they need no jargon to cover confusions Their mastery allows them to present the essentials in simple unadorned forms and through genuinely illustrative examples Any manager or director trying to navigate dynamic markets can use this book to learn new ways of thinking explore new possibilities and study historical experiences Robert Artigiani United States Naval Academy Current thinking about evolutionary dynamics increasingly relies on co evolution and co evolution increasingly implies complex dynamics of one sort or another This volume brings together a capable and well balanced group of thinkers on these topics who explore these deeply related concepts with up to date and advanced tools and concepts For anyone wishing to learn about the latest developments in these rapidly developing areas this book is highly recommended J Barkley Rosser Jr James Madison University US This book applies ideas and methods from the complexity perspective to key concerns in the social sciences exploring co evolutionary processes that have not yet been addressed in the technical or popular literature on complexity Authorities in a variety of fields including evolutionary economics innovation and regeneration studies urban modelling and history re evaluate their disciplines within this framework The book explores the complex dynamic processes that give rise to socio economic change over space and time with reference to empirical cases including the emergence of knowledge intensive industries and decline of mature regions the operation of innovative networks and the evolution of localities and cities Sustainability is a persistent theme and the practicability of intervention is

examined in the light of these perspectives Specialists in disciplines that include economics evolutionary theory innovation industrial manufacturing technology change and archaeology will find much to interest them in this book In addition the strong interdisciplinary emphasis of the book will attract a non specialist audience interested in keeping abreast of current theoretical and methodological approaches through evidence based and practical examples

**Local Identities** Fokke Albert Gerritsen,2003 Gerritsen s study investigates how small groups of people households or local communities constitute and represent their social identity by shaping the landscape around them Examining things like house building and habitation cremation and burial and farming and ritual practice Gerritsen develops a new theoretical and empirical perspective on the practices that create collective senses of identity and belonging An explicitly diachronic approach reveals processes of cultural and social change that have previously gone unnoticed providing a basis for a much more dynamic history of the late prehistoric inhabitants of this region

**Archaeological Method and Theory** Linda Ellis,2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology
