The Fleets In:

Profile of Motor-vehicle Fleets in Atlanta 1994 United States. Energy Information Administration, 1995 The Naval Annual , 1901 **Techno-economic performance review of selected fishing fleets in Europe** Carvalho, N.; Anrooy, R.; Vassdal, T.; Dağtekin, M., 2020-06-01 This techno economic performance review of selected fishing fleets in Europe presents the findings of European country level studies of fishing fleets of Denmark France Germany Italy Norway Spain Turkey and the United Kingdom of Great Britain and Northern Ireland The review includes financial and economic information of 42 fishing fleet segments including demersal trawlers purse seiners pelagic trawlers long liners coastal fishing vessels using passive gears pots and traps fishing vessels and small scale hand liners Analysis of the costs and earnings data of 42 of the main fishing fleet segments in Europe in 2016 showed that all types of vessels had a positive gross cash flow The average net profit margin of the 41 fishing fleet segments analysed was very good with 20 percent Eighty five percent of the fleet segments presented positive return on fixed tangible assets ROFTAs of 10 percent and higher However 38 percent of the fleet segments demonstrated return on investment ROI percentages lower than 10 percent Comparing the 2016 financial and economic performance results with those of some of the same fleet segments included in the 2002 03 review study it is clear that general fishing fleet performance in Europe improved All eight countries together saw a decrease in the number of fishing vessels between 2008 and 2016 of 10 percent from nearly 60 000 to less than 54 000 vessels Each of the countries also saw a reduction in total fleet capacity in gross tonnage GT and kilowatts kW The vessel age structure showed an increasing trend for most of the fishing fleet segments Navy Logistic Support of the 7th Fleet in Southeast Asia: Continuing Logistics Issues and Constraints United States. General Accounting Office, 1974 Techno-economic performance review of selected fishing fleets in North and South America Kitts, A., Van Anrooy, R., Van Eijs, S., Pino Shibata, J., Pallalever Pérez, R., Gonçalves, A.A., Ardini, G., Liese, C., Pan, M., Steiner, E., 2020-06-01 This techno economic performance review of selected fishing fleets in North and South America presents the findings of four country level studies of fishing fleets in the United States of America Brazil Chile and Peru The review includes financial and economic information of 21 fishing fleet segments including shrimp and groundfish trawlers demersal trawlers longliners purse seiners dredgers as well as hook and line fishing vessels Analysis of the costs and earnings data of these important fishing fleet segments in North and South America using survey data from 2012 2017 for the US fleet segments and 2018 data for the South American countries fleets showed that 81 percent of the fleet segments had a positive net cash flow The net profit margins of 38 percent of the 21 fishing fleet segments were 10% Two thirds 67% of the fleet segments presented positive results in terms of their capital productivity as the return on fixed tangible assets ROFTA was positive Twenty four percent of the fleet segments showed return on investment ROI figures of twenty percent or more A majority of the Chilean and Peruvian fleet segments had ROIs of ten percent or higher in 2018 The financial and economic performance of the fishing fleet segments is

not only affected by the seafood prices but also by the fisheries management regime in place fish species targeted fish stock status and fishing methods and technologies applied The age structure of the fishing vessels shows an increasing trend for most of the fishing fleet segments in this review which adds to the apparent profitability of the vessels in these fleet segments as depreciation and interests on loans are minimized

Suggestions as to the Best Method of Bringing Large Steam Fleets Into Action Robert WAUCHOPE (Admiral.),1858

Review of the techno-economic performance of the main global fishing fleets Van Anrooy, R., Carvalho, N., Kitts, A., Mukherjee, R., Van Eijs, S., Japp, D., Ndao, S.,2021-06-11 This review of the techno economic performance of the main global fishing fleets discusses the outcomes from 20 country level studies of fishing fleets from Africa Asia Europe North and South America It includes financial socio economic and technical information from 103 major semi industrial fishing fleet segments which are responsible for an estimated 39 percent of marine capture fisheries production worldwide The analysis of vessel characteristics reveals substantial differences in fishing capacity in terms of vessel length tonnage and power between fleet segments An increase in the gross tonnage of average vessels was observed in fleet segments also covered in previous reviews Substantial increases in average length overall and engine power were observed in several Asian fishing fleets The age structure of the fishing fleets in most regions except Asia shows an upward trend An analysis of the costs and earnings data showed that labour and running costs were the two main cost components for the majority of fleet segments Ninety two percent of 97 fleet segments reported a positive net cash flow in the year they were surveyed in the 2016 2019 period Net profit margins of 10 percent or more were realized by average fishing vessels in 73 percent of the fleet segments Returns on investment ROIs of 10 percent or higher were realized by 61 percent of the fleet segments The review also discusses developments in fishing technologies These developments along with a general increase in seafood prices successful fisheries management in some areas and improved fleet capacity management in Europe and North America have all contributed to the ongoing positive financial and economic performance of the main global fishing fleets in recent years

Admiral of the Fleet Mrs. Fred Egerton,Fred Egerton,1896

Warships of the Soviet Fleets 1939-1945 Przemyslaw Budzbon,Jan Radziemski,Marek Twardowski,2022-10-30 Seventy five years after the end of the Second World War the details of Soviet ships their activities and fates remain an enigma to the West In wartime such information was classified and after a brief period of glasnost openness the Russian state has again restricted access to historical archives Therefore the value and originality of this work is difficult to exaggerate It sees the first publication of reliable data on both the seagoing fleets and riverine flotillas of the Soviet Navy listing over 6200 vessels from battleships to river gunboats and mercantile conversions as well as purpose built warships Divided into three volumes this first covers major surface warships down to MTBs and armored gunboats as well as submarines For every class there is a design history analyzing strategic tactical and technical considerations and individual ship detail includes construction yard key building dates commissioning fleet designations relocations and ultimate fate Once

a closely guarded secret the wartime loss of every ship and boat over 1000 is described Furthermore the confusion caused by frequent name changes is clarified by indexes that run to 16 000 items By following the ships through both their wartime and earlier history the book reveals many aspects of Russian history that remain highly sensitive clandestine co operation with Weimar Germany and fascist Italy the NKVD enforced closure of Soviet borders the Gulag Fleet the faked Metallist sinking that excused the military occupation of Estonia and the ill conceived pact with Nazi Germany Restrictions recently imposed on historical publications in Russia mean this book could certainly not have been published there as proven by the fact that most of the authors Russian collaborators preferred not to disclose their identities This is undoubtedly one of the most important naval reference works of recent years and will be welcomed by anyone with an interest in warships the Soviet Navy or wider maritime aspects of the Second World War

Techno-economic performance review of selected fishing fleets in Asia Van Anrooy, R., Mukherjee, R., Wakamatsu, H., Song, L., Muawanah, U., Jin Cha, B., Narayana Kumar, R., Parappurathu, S., Yadava, Y.S., Tietze, U.,2020-10-26 This techno economic performance review of selected fishing fleets in Asia presents the findings of six country level studies of fishing fleets in Bangladesh China India Indonesia Japan and the Republic of Korea The review includes financial and economic information of 27 major fishing fleet segments including trawlers gillnetters long liners jiggers purse seiners as well as pole and line fishing vessels An analysis of the costs and earnings data of these important fishing fleet segments in Asia was carried out using national statistics of 2017 for the Japanese and the Korean fleet segments and 2018 19 survey data for the other countries Eighty nine percent of the 27 fishing fleet segments reported positive net cash flows Seventy percent of the fishing fleets realized net profit margins of more than 10 percent Eighty one percent of the fishing fleets reported positive results in terms of their capital productivity as theirs returns on fixed tangible assets ROFTAs were positive The review shows that investments in fishing vessels and fishing operations of these major Asian fishing fleets are generally profitable Marine capture fishing is a financially viable economic activity in all six major fishing nations included in the review It generates enough income to cover depreciation costs interest and loan repayments and provides sufficient financial resources for reinvestment Nearly 60 percent of the fishing fleets generated returns on investment ROIs of 15 percent and higher which signals an attractive sector for investments The total gross value added GVA of the 27 fishing fleets to the Asian regional economy was substantial and estimated at around USD 66 billion The review also reveals a need for adequate management measures including fleet capacity management plans to improve the status of fish stock in the region and maintain a healthy and profitable fishing sector
