*Tribune Popular Science, 1874 (Classic Reprint)* Louis Agassiz, 2018-03-18 Excerpt from Tribune Popular Science 1874  
Now let us consider the might that resides in the sun If the sun was merely an orb very much larger than the earth as we see he is There might still not be the force necessary to the sun as a ruler over the earth Let me give you an idea of how large the sun is I am in the habit In England when I wish to speak of the size of the sun of informing my audience that this country england in which we live which seems to us so large Is nevertheless small by comparison with the earth for if the earth were one inch in diameter England would be a small triangular speck which you could scarcely recognize But I am afraid that to an American audience that comparison would be imperfect In fact I have heard that an American traveling in England found the country so small that he at once sought the central counties and was even then afraid to go out in the evening for fear of falling of the little island laughton We in England whether it be the natural courage of our disposition or the effect of long habit are not troubled with that feeling But even America is so small compared with the sun That if there were a Spot upon the sun as large as the whole of America it would be quite invisible to the naked eye In deed if an object as large as the earth were placed immediately before the sun and there appeared as a black disk it would nevertheless require a large telescope to make it visible 108 times does the sun's diameter exceed that of the earth and the surface of the sun exceeds that of the earth 108 times 108 times About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Tribune Popular Science*, 1874 **Tribune Popular Science, Vol. 5 (Classic Reprint)** Louis Agassiz, 2017-11-26 Excerpt from Tribune Popular Science Vol 5 But now let us pass from the question of the sun's might to its heat and light The sun is the source of all these forms of light and life which exist upon the earth That is no idle pream Every form of force upon the earth every action that we perform About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **The American Catalog**, 1881 **Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ...
