Trigonometric Delights:

Trigonometric Delights E. Maor, 1998 In this book Maor rejects the usual arid descriptions of the sine and cosine functions and their trigonometric relatives He brings the subject to life in a compelling blend of mathematics history and biography Form the proto trigonometry of the Egyptian pyramid builders to Renaissance Europe s quest for more accurate artillery from the earliest known trigonometric table *Mathematics for Secondary School Teachers* Elizabeth G. Bremigan, Ralph J. Bremigan, John D. Lorch, 2011 Mathematics for Secondary School Teachers discusses topics of central importance in the secondary school mathematics curriculum including functions polynomials trigonometry exponential and logarithmic functions number and operation and measurement Acknowledging diversity in the mathematical backgrounds of pre service teachers and in the goals of teacher preparation programs the authors have written a flexible text through which instructors can emphasize any of the following Basics exploration of key pre college topics from intuitive and rigorous points of view Connections exploration of relationships among topics using tools from college level mathematics Extensions exploration of college level mathematical topics that have a compelling relationship to pre college mathematics Mathematics for Secondary School Teachers provides a balance of discovery learning and direct instruction Activities and exercises address the range of learning objectives appropriate for future teachers Beyond the obvious goals of conceptual understanding and computational fluency readers are invited to devise mathematical explanations and arguments create examples and visual representations remediate typical student errors and misconceptions and analyze student work Introductory discussion questions encourage prospective teachers to take stock of their knowledge of pre college topics A rich collection of exercises of widely varying degrees of difficulty is integrated with the text Activities and exercises are easily adapted to the settings of individual assignments group projects and classroom discussions Mathematics for Secondary School Teachers is primarily intended as the text for a bridge or capstone course for pre service secondary school mathematics teachers It can also be used in alternative licensure programs as a supplement to a mathematics methods course as the text for a graduate course for in service teachers and as a resource and reference for in service faculty development The Mathematics that Every Secondary Math Teacher Needs to Know Alan Sultan, Alice F. Artzt, 2010-09-13 What knowledge of mathematics do secondary school math teachers need to facilitate understanding competency and interest in mathematics for all of their students This unique text and resource bridges the gap between the mathematics learned in college and the mathematics taught in secondary schools Written in an informal clear and interactive learner centered style it is designed to help pre service and in service teachers gain the deep mathematical insight they need to engage their students in learning mathematics in a multifaceted way that is interesting developmental connected deep understandable and often surprising and entertaining Features include Launch questions at the beginning of each section Student Learning Opportunities Questions from the Classroom and highlighted themes throughout to aid readers in
