*The Shape of Wonder* Alan Lightman, Martin Rees, 2025-09-02 In this captivating insightful book acclaimed physicists Alan Lightman and Martin Rees illuminate the life and work of numerous scientists in order to demystify the scientific process and show that scientists are concerned citizens just like the rest of us Remarkable Illuminating with refreshing clarity the ordinary and sometimes extraordinary work of scientists This book is essential reading Jennifer Ackerman bestselling author of *What an Owl Knows* In an age of rapid scientific discovery and technological advancement it's understandable that many feel uneasy about the future While we might have confidence in these new developments when we go to the hospital for a medical procedure fly in an airplane or take an elevator to the top floor of a building the motivations and lives of scientists themselves feel shrouded from public view There is a growing sense that scientists are not to be trusted that they may be guided by political or financial interests or beholden to governments or state institutions This growing mistrust of scientists is an urgent problem With the onset of climate change the imminent threats of pandemic or nuclear war and rapid acceleration in the fields of artificial intelligence and DNA sequencing innovations in science have the potential to change the world It's crucial that we not only gain a better

understanding of science as a field but also reestablish trust with its practitioners The Shape of Wonder guides us through the fascinating lives and minds of scientists around the world and throughout time from a young theoretical physicist who works as a research assistant professor at the University of Washington and rock climbs in their free time to German physicist Werner Heisenberg in his early life when he was a student of music and philosophy to Govind Swarup an Indian astronomer whose work on radio telescopes was profoundly important We get an inside peek at what makes scientists tick their daily lives passions and concerns about the societies they live in In this brilliant and elucidative work Lightman and Rees pull back the curtain on the field of science revealing that scientists are driven by the same sense of curiosity wonder and responsibility towards the future that shapes us all
