What is Life? Josef Seifert, 2021-11-15 This book makes four bold claims 1 life is an ultimate datum open to philosophical analysis and irreducible to physical reality hence all materialist reductionist explanations most current theories of life are false 2 All life presupposes soul entelechy without which a being would at best fake life 3 The concept of life is analogous and the most direct access to life in its irreducibility is gained through consciousness 4 All life possesses an objective and intrinsic value that needs to be respected human life possesses beyond this an inviolable dignity Life and personal life are pure perfections it being absolutely better to possess personal life than not to possess it Chapter 1 the metaphysical essence and the many meanings of life as well as its transcendental character Chapter 2 the irreducibility of biological life its amazing empirical and philosophically intelligible essential features and the ways of knowing them Chapter 3 the immediate evidence and indubitable givenness of mental conscious life as well as questions of brain death and immortality Chapter 4 the inviolable
