Applied Time Series Econometrics

Helmut Lütkepohl, Markus Krätzig, 2004-08-02 Time series econometrics is a rapidly evolving field Particularly the cointegration revolution has had a substantial impact on applied analysis Hence no textbook has managed to cover the full range of methods in current use and explain how to proceed in applied domains This gap in the literature motivates the present volume The methods are sketched out reminding the reader of the ideas underlying them and giving sufficient background for empirical work The treatment can also be used as a textbook for a course on applied time series econometrics Topics include unit root and cointegration analysis structural vector autoregressions conditional heteroskedasticity and nonlinear and nonparametric time series models Crucial to empirical work is the software that is available for analysis New methodology is typically only gradually incorporated into existing software packages Therefore a flexible Java interface has been created allowing readers to replicate the applications and conduct their own analyses

The Palgrave Companion to Chicago Economics Robert A. Cord, 2023-01-01 The University of Chicago has been and continues to be one of the most important global centres for economics With six chapters on themes in Chicago economics and 33 chapters on the lives and work of Chicago economists this volume shows how economics became established at the University how it produced some of the world's best known economists including Frank Knight Milton Friedman and Robert Lucas and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast this volume provides economists especially those interested in macroeconomics and the history of economic thought with an in depth analysis of Chicago economics

Bayesian Analysis in Econometrics and Statistics Arnold Zellner,1997 This book presents some of Arnold Zellner s outstanding contributions to the philosophy theory and application of Bayesian analysis particularly as it relates to statistics econometrics and economics The volume contains both previously published and new material which cite and discuss the work of Bayesians who have made a contribution by helping researchers and analysts in many professions to become more effective in learning from data and making decisions Bayesian and non Bayesian approaches are compared in several papers Other articles include theoretical and applied results on estimation model comparison prediction forecasting prior densities model formulation and hypothesis testing In addition a new information processing approach is presented that yields Bayes s Theorem as a perfectly efficient information processing rule This volume will be essential reading for academics and students interested in qualitative methods as well as industrial analysts and government officials

Structural Econometric Modeling and Time Series Analysis Franz C. Palm,1981

Elements of Time Series Econometrics : An Applied Approach Evžen Kočenda,Alexandr Černý ,2014-03-01 This book presents the numerous tools for the econometric analysis of time series The text is designed with emphasis on the practical application of theoretical tools Accordingly material is presented in a way that is easy to understand In many cases intuitive explanation and understanding of the studied phenomena are offered Essential concepts are illustrated by clear cut examples The attention of readers is drawn to numerous applied works where the use of specific techniques is best illustrated Such applications are chiefly connected with issues of recent economic transition and European integration The

outlined style of presentation makes the book also a rich source of references The text is divided into four major sections The first section The Nature of Time Series gives an introduction to time series analysis The second section Difference Equations describes briefly the theory of difference equations with an emphasis on results that are important for time series econometrics The third section Univariate Time Series presents the methods commonly used in univariate time series analysis the analysis of time series of one single variable The fourth section Multiple Time Series deals with time series models of multiple interrelated variables Appendices contain an introduction to simulation techniques and statistical tables

Time Series Analysis and Macroeconometric Modelling Kenneth Frank Wallis,1995 The first part deals with time series econometrics and includes significant early contributions to the development of the LSE tradition in time series econometrics which is the dominant British tradition and has considerable influence worldwide Later sections discuss theoretical and practical issues in modelling seasonality and forecasting with applications in both large scale and small scale models

History and Methodology of Econometrics Neil De Marchi,Christopher Gilbert,1989 The past decade has seen a lively debate on the methodology of econometrics econometricians can now estimate almost any model they choose to specify but many have expressed doubts about the practical usefulness and scientific validity of such models In this volume prominent historians of econometrics work with methodologists and practicing econometricians to illuminate current controversies and explain the origins of the present situation

New Introduction to Multiple Time Series Analysis Helmut Lütkepohl,2005-12-06 This reference work and graduate level textbook considers a wide range of models and methods for analyzing and forecasting multiple time series The models covered include vector autoregressive cointegrated vector autoregressive moving average multivariate ARCH and periodic processes as well as dynamic simultaneous equations and state space models Least squares maximum likelihood and Bayesian methods are considered for estimating these models Different procedures for model selection and model specification are treated and a wide range of tests and criteria for model checking are introduced Causality analysis impulse response analysis and innovation accounting are presented as tools for structural analysis The book is accessible to graduate students in business and economics In addition multiple time series courses in other fields such as statistics and engineering may be based on it Applied researchers involved in analyzing multiple time series may benefit from the book as it provides the background and tools for their tasks It bridges the gap to the difficult technical literature on the topic

Advanced Lectures in Quantitative Economics ,1990 **Time Series and Dynamic Models** Christian Gourieroux,Alain Monfort,1997 In this book Christian Gourieroux and Alain Monfort provide an up to date and comprehensive analysis of modern time series econometrics They have succeeded in synthesising in an organised and integrated way a broad and diverse literature While the book does not assume a deep knowledge of economics one of its most attractive features is the close attention it pays to economic models and phenomena throughout The coverage represents a major reference tool for graduate students researchers and applied economists The book is divided into four

sections Section one gives a detailed treatment of classical seasonal adjustment or smoothing methods Section two provides a thorough coverage of various mathematical tools Section three is the heart of the book and is devoted to a range of important topics including causality exogeneity shocks multipliers cointegration and fractionally integrated models The final section describes the main contribution of filtering and smoothing theory to time series econometric problems **Journal of Economic Literature** ,2005
