The First World:

Causes and Consequences of the First World War Stewart Ross, 2003 Examines the backdrop of rivalry among world powers the events that immediately preceded the first World War the effects of the war itself and its long term consequences Suggested level secondary *Issues of Governance, Security, and Development in Contemporary Africa* Mohamed Saliou Camara, Alem Hailu, Sabella O. Abidde, 2023-12-15 Governance security and development are three critical components of a dialectical nexus that is both dominant and determinant for any objective and fruitful quest for the understanding of the trajectory of a country a region or in the case of Africa a continent from a colonial past to a neocolonial and meta colonial present and toward a future of strategic optimal independence and self reliance That colonial past and the ensuing neocolonial and meta colonial present have made these critical components and the dialectical nexus that they form particularly challenging for the African continent For this reason *Issues of Governance Security and Development in Contemporary Africa* offers an in depth interdisciplinary analysis of the challenges that contemporary Africa faces within these critical areas as well as the resources and prospects that the continent possesses and can leverage to overcome the said challenges Using case studies involving a range of countries across the continent Mohamed Saliou Camara Alem Hailu and Sabella O Abidde argue that Africa needs to decolonize the terms of reference that guide its nation building statecraft and national development agenda in ways that will facilitate the establishment of viable systems of governance and security and the promotion of genuine development *Jews, Confucians, and Protestants* Lawrence E. Harrison, 2012-12-16 Multiculturalism the belief that no culture is better or worse than any other it is merely different has come to dominate Western intellectual thought and to serve as a guide to domestic and foreign policy and development aid But what if multiculturalism itself is flawed What if some cultures are more prone to progress than others and more successful at creating the cultural capital that encourages democratic governance social justice for all and the elimination of poverty In *Jews Confucians and Protestants Cultural Capital and the End of Multiculturalism* Lawrence E Harrison takes the politically incorrect stand that all cultures are not created equal Analyzing the performance of 117 countries grouped by predominant religion Harrison argues for the superiority of those cultures that emphasize Jewish Confucian and Protestant values A concluding chapter outlines ways in which cultural change may substantially transform societies within a generation

Handbook on Migration and Human Rights Ruth Rubio Marín, Dorothy Estrada-Tanck, Benedita Menezes Queiroz, Fulvia Staiano, 2025-09-10 This Research Handbook examines the complex issues faced by migrants and refugees in securing their human rights By challenging and reformulating the crisis narrative often perpetuated by states and international organizations it provides a gendered cutting edge in depth investigation of key themes central to the human rights implications of migration **The English and Their History** Robert Tombs, 2015-10-27 A New York Times 2016 Notable Book Robert Tombs s momentous *The English and Their History* is both a startlingly fresh and a uniquely inclusive account of

the people who have a claim to be the oldest nation in the world The English first came into existence as an idea before they had a common ruler and before the country they lived in even had a name They have lasted as a recognizable entity ever since and their defining national institutions can be traced back to the earliest years of their history The English have come a long way from those first precarious days of invasion and conquest with many spectacular changes of fortune Their political economic and cultural contacts have left traces for good and ill across the world This book describes their history and its meanings from their beginnings in the monasteries of Northumbria and the wetlands of Wessex to the cosmopolitan energy of today s England Robert Tombs draws out important threads running through the story including participatory government language law religion the land and the sea and ever changing relations with other peoples Not the least of these connections are the ways the English have understood their own history have argued about it forgotten it and yet been shaped by it These diverse and sometimes conflicting understandings are an inherent part of their identity Rather to their surprise as ties within the United Kingdom loosen the English are suddenly embarking on a new chapter The English and Their History the first single volume work on this scale for more than half a century and which incorporates a wealth of recent scholarship presents a challenging modern account of this immense and continuing story bringing out the strength and resilience of English government the deep patterns of division and also the persistent capacity to come together in the face of danger

Analysis and Practices Frans H. van Eemeren, Rob Grootendorst, J. Anthony Blair, Charles A. Willard, 2011-07-13 No detailed description available for *Analysis and Practices*

Economic History of Warfare and State Formation Jari Eloranta, Eric Golson, Andrei Markevich, Nikolaus Wolf, 2016-09-19 This edited volume represents the latest research on intersections of war state formation and political economy i e how conflicts have affected short and long run development of economies and the formation or destruction of states and their political economies The contributors come from different fields of social and human sciencies all featuring an interdisciplinary approach to the study of societal development The types of big issues analyzed in this volume include the formation of European and non European states in the early modern and modern period the emergence of various forms of states and eventually modern democracies with extensive welfare states the violent upheavals that influenced these processes the persistence of dictatorships and non democratic forms of government and the arrival of total war and its consequences especially in the context of twentieth century world wars One of the key themes is the dichotomy between democracies and dictatorships namely what were the origins of their emergence and evolution why did some revolutions succeed and other fail and why did democracies on the whole emerge victorious in the twentieth century age of total wars The contributions in this book are written with academic and non academic audiences in mind and both will find the broad themes discussed in this volume intuitive and useful
