Text And Culture:

Culture as Text, Text as Culture Elodie Lafitte, Christina Wall, Mary Cobb Wittrock, 2020-05-22 Culture as Text Text as Culture represents a novel interdisciplinary analysis of textuality as it pertains to Cultural Studies More specifically the work examines how the analysis of texts has shaped the most vital contemporary debate of Cultural Studies the recognition that all texts and their contexts are constructs Building upon a Post structural Post modern understanding of truth as a construct Cultural Studies has long since acknowledged the ability of texts to express the time and culture of their origin This work however expands this idea demonstrating not only how a culture is preserved in a text but how that text can in turn define its culture even redefine its history This compendium is structured around four of the most prominent contemporary topics of Cultural Studies the relationship between historical and fictional writing the ability of authors to recreate or redefine history the relationship between language and image and the ability for traditionally marginalized groups to reassert their place in history The book presents articles from a large spectrum of disciplinary fields and civilizations in order to demonstrate how the application of Cultural Studies can unite seemingly disparate disciplines **Text and Culture** ,1989

Culture, Language, Text Fredrik Christian Brøgger, 1992 This book is a pioneering attempt within the university study of English as a foreign language to provide the discipline of culture studies particularly the study of American British civilization with a theory and methodology of its own Focusing on the anthropological concept of culture as belief systems the author suggests that culture studies should be primarily concerned with the analysis of the interplay between language and ideology Essentially interdisciplinary the field is conceived as a philological text oriented study of culture

Chinua Achebe's Things Fall Apart - Bridging Cultural Differences Andrea Fischer, 2004-07-13 Seminar paper from the year 2004 in the subject English Language and Literature Studies Linguistics grade 1 7 A University of Tübingen New Philology language English abstract Usually when we encounter such a book we try to solve those problems with the help of literary strategies and approaches like literary theory reading about the author and the epoch studying of interpretations of the work deconstructing the text and looking at the effects of the text with regard to us readers Besides these literary strategies which lead to an interpretation of the text a linguistic analysis of literary texts helps us either to get a full understanding of the text or to comprehend why we have problems understanding the text However the linguistic analysis of literature is not an interpretation it is more an explanation of how it means and why it means what it does Linguistics demonstrates why a text is interpreted in this or that way and makes clearer what the underlying problems in the interpretation are The main aim of this essay is to show and explain the linguistic strategies and mechanisms that enable us to bridge the cultural differences to demonstrate how cultural knowledge is triggered off and to show how it is possible to learn something about the culture The goal of this essay is to show that readers can understand the text although they have no knowledge of the culture at all In the first part of this work I will settle the question why it is

difficult for us to understand the culture behind the text and give a brief account of the problems with which we are confronted in the process of learning about the culture in the book In the second and third passage I will introduce and settle the theoretical basis of linguistic strategies that help us to understand the text and to reconcile the cultural contrasts The following part will show the practical application of the linguistic strategies with examples of Achebe's *Things Fall Apart*
