Situating Selves:

Carbaugh, 1996-01-01 Provides a communication theory of identity Shows how listening to communication in cultural scenes can help reveal how deeply identity is situated in various communicative practices **Self-Study of Practice as a Genre of Qualitative Research** Stefinee Pinnegar, Mary Lynn Hamilton, 2009-04-05 Teacher educators live hectic lives at institutional and discipline boundaries Our greatest potential for influence is through developing relationships with others in our practice Our work is fundamentally relational and emotional We are obligated to the teachers we teach and the public students they teach Our practice exists in the midst of experience conflicting and often hostile boundaries and between what we know from research and what we understand from practice Self study of practice invites researchers to embrace the hectic and fragmented territory of practice as the space for study This book educates those who would like to explore practice in the methodology of self study It provides both a pragmatic and theoretic guide It grounds the research in ontology and establishes dialogue as the inquiry process It supports researchers through the use of frameworks to guide research and explication of strategies for conducting it *Exploring Self toward expanding Teaching, Teacher Education and Practitioner Research* Oren Ergas, Jason K Ritter, 2020-10-29

Against the backdrop of a pull toward external standards and accountability this collection of chapters re grounds us in the importance of bringing the self to the foreground of the discourse of teaching teacher education and practitioner research *Self-Deception's Puzzles and Processes* Jason Kido Lopez, 2016-08-16 The contemporary literature on self deception was born out of Jean Paul Sartre's work on bad faith lying to oneself As time has progressed the conception of self deception has moved further and further away from Sartre's conception of bad faith In *Self Deception's Puzzles and Processes A Return to a Sartrean View* Jason Kido Lopez argues that this departure is a mistake and

that we should return to thinking about self deception in a Sartrean fashion in which we are self deceived when we intentionally use the strategies and methods of interpersonal deception on ourselves Since literally tricking ourselves cannot work we will always see through our own self deception after all self deception merely consists of the attempt to trick ourselves in this way Other scholars have rejected this notion of self deception historically dismissing it as paradoxical Lopez argues first that it isn't paradoxical and he further suggests that moving away from this notion of self deception has caused the contemporary literature on the topic to be littered with disparate and conflicting theories Indeed there are a great many ways to avoid the allegedly paradoxical Sartrean notion of self deception and the resulting plethora of accounts lead to a fragmented picture of self deception If however the Sartrean view isn't paradoxical then there was no need for the host of contradictory theories and most researchers on self deception have missed what was originally so intriguing about self deception that it like bad faith is the process of literally trying to trick oneself into believing what is false or unwarranted Self Deception's Puzzles and Processes will be of great interest to students and scholars of epistemology philosophy of mind psychology and continental philosophy and to anyone else interested in the problems of self deception Using Self-Assessment to Improve Student Learning Lois Ruth Harris, Gavin T.L. Brown, 2018-04-20 Using Self Assessment to Improve Student Learning synthesizes research on self assessment and translates it into actionable guidelines and principles for pre service and in service teachers and for school leaders teacher educators and researchers Situated beyond the simple how to frameworks currently available for teachers and graduate students this volume illuminates self assessment's complexities and substantial promise to strategically move students toward self regulated learning and internalized goals Addressing theory empirical evidence and common implementation issues the book's developmental approach to quality self assessment practices will help teachers leaders and scholars maximize their impact on student self regulation and learning
