Three Ecologies:

The Three Ecologies Félix Guattari, 2000 A critique of capitalism and a manifesto for a new way of thinking this book is also an introduction to the work of one of Europe's most radical thinkers This edition includes a chronology of Guattari's life and work introductions to both his general philosophy and to the work itself and extended notes to the original text *The Three Ecologies* Félix Guattari, 2014 Extending the definition of ecology to encompass social relations and human subjectivity as well as environmental concerns The Three Ecologies argues that the ecological crises that threaten our planet are the direct result of the expansion of a new form of capitalism and that a new ecosophical approach must be found which respects the differences between all living systems A powerful critique of capitalism and a manifesto for a new way of thinking the book is also an ideal introduction to the work of one of Europe's most radical thinkers This edition includes a chronology of Guattari's life and work introductions to both his general philosophy and to the work itself and extended notes to the original text *Affective Ecocriticism* Kyle Bladow, Jennifer Ladino, 2018-11-01 Scholars of ecocriticism have long tried to articulate emotional relationships to environments Only recently however have they begun to draw on the complex interdisciplinary body of research known as affect theory Affective Ecocriticism takes as its premise that ecocritical scholarship has much to gain from the rich work on affect and emotion happening within social and cultural theory geography psychology philosophy queer theory feminist theory narratology and neuroscience among others This vibrant and important volume imagines a more affective and consequently more effective ecocriticism as well as a more environmentally attuned affect studies These interdisciplinary essays model a range of approaches to emotion and affect in considering a variety of primary texts including short story collections films poetry curricular programs and contentious geopolitical locales such as Canada's Tar Sands Several chapters deal skeptically with familiar environmentalist affects like love hope resilience and optimism others consider what are often understood as negative emotions such as anxiety disappointment and homesickness all with an eye toward reinvigorating or reconsidering their utility for the environmental humanities and environmentalism Affective Ecocriticism offers an accessible approach to this theoretical intersection that will speak to readers across multiple disciplinary and geographic locations **Félix Guattari** Gary Genosko, 2009-04-20 This is an introduction to the thought of the radical French thinker Félix Guattari Guattari's main works were published in the 1970s and 1980s His background was in psychoanalysis he was trained by Lacan and he practised as a psychoanalyst for much of his life He developed a distinctive psychoanalytic method informed always by his revolutionary politics Guattari was actively involved in numerous political movements from Trotskyism to Autonomism tackling ecological and sexual politics along the way A true believer in collectivity much of his work was written in collaboration most famously with Gilles Deleuze This is also an introduction to key concepts such as schizoanalysis transversality a signifying semiotics and various kinds of machine [Scarlet Experiment](#) Jeff Karnicky, 2016-11 Emily Dickinson's poem Split the Lark refers to the scarlet experiment by which scientists

destroy a bird in order to learn more about it Indeed humans have killed hundreds of millions of birds for science fashion curiosity and myriad other reasons In the United States alone seven species of birds are now extinct and another ninety three are endangered Conversely the U S conservation movement has made bird watching more popular than ever saving countless bird populations and while the history of actual physical human interaction with birds is complicated our long aesthetic and scientific interest in them is undeniable Since the beginning of the modern conservation movement in the mid nineteenth century human understanding of and interaction with birds has changed profoundly In *Scarlet Experiment* Jeff Karnicky traces the ways in which birds have historically been seen as beautiful creatures worthy of protection and study and yet subject to experiments scientific literary and governmental that have irrevocably altered their relationship with humans This examination of the management of bird life in America from the nineteenth century to today which focuses on six bird species finds that renderings of birds by such authors as Henry David Thoreau Emily Dickinson Don DeLillo and Christopher Cokinos have also influenced public perceptions and actions *Scarlet Experiment* speculates about the effects our decisions will have on the future of North American bird ecology

Nervous Systems Johanna Gosse, Timothy Stott, 2021-11-02 The contributors to *Nervous Systems* reassess contemporary artists and critics engagement with social political biological and other systems as a set of complex and relational parts an approach commonly known as systems thinking Demonstrating the continuing relevance of systems aesthetics within contemporary art the contributors highlight the ways that artists adopt systems thinking to address political social and ecological anxieties They cover a wide range of artists and topics from the performances of the Argentinian collective the Rosario Group and the grid drawings of Charles Gaines to the video art of Singaporean artist Charles Lim and the mapping of global logistics infrastructures by contemporary artists like Hito Steyerl and Christoph B chel Together the essays offer an expanded understanding of systems aesthetics in ways that affirm its importance beyond technological applications detached from cultural contexts Contributors Cristina Albu Amanda Boetzkes Brianne Cohen Kris Cohen Jaimey Hamilton Faris Christine Filippone Johanna Gosse Francis Halsall Judith Rodenbeck Dawna Schuld Luke Skrebowski Timothy Stott John Tyson

Deleuze/Guattari & Ecology Bernd Herzogenrath, 2009 What does ecology mean if this concept cannot be grounded anymore in an essentialist and clear cut separation of nature and culture nature and man human and non human as Deleuze and Guattari in both their individual and collective works suggest Man and nature are not like two opposite terms confronting each other not even in the sense of bipolar opposites within a relationship of causation ideation or expression cause and effect subject and object etc rather they are one and the same essential reality the producer product Anti Oedipus 4 5 Deleuze Guattari s generalized ecology turns Ecology into a complex transdisciplinary project linking philosophy art sociology literature politics music history the hard and soft sciences Deleuze Guattari offer a perspective on ecology as a comprehensive natural ontology of complex material systems without falling into the trap of the Cartesian dualism of nature and culture that is still operative in much of the mainstream of ecological
