**Living with Earth** Travis Hudson,2016-09-17 For many students with no science background environmental geology may be one of the only science courses they ever take Living With Earth An Introduction to Environmental Geology is ideal for those students fostering a better understanding of how they interact with Earth and how their actions can affect Earth's environmental health The informal reader friendly presentation is organized around a few unifying perspectives how the various Earth systems interact with one another how Earth affects people creating hazards but also providing essential resources and how people affect Earth Greater emphasis is placed on environment and sustainability than on geology unlike other texts on the subject Essential scientific foundations are presented but the ultimate goal is to connect students proactively to their role as stakeholders in Earth's future *The UFO Experience* J. **Interactions Between Iranian and American Literatures** Naghmeh Esmaeilpour,2024-05-14 Introducing narrative mobility as a new approach in comparative studies of Iran and the US this book reinterprets the politics and aesthetics of relations between the nations through an analysis of Iranian and American authors The book focuses specifically on three authors Simin Daneshvar Shahriar Mandanipour and Don DeLillo who each employ narrative mobility to rethink intercultural negotiation addressing parallel issues in America and Iran from different but complementary perspectives The book analyzes the employment of parallel narrational techniques presenting physically and virtually mobile characters who embody their respective countries as they move from one culture to another The strange affinity between Iran and the US is ultimately revealed by viewing literary works as a contact zone through which the complicated relations and shared history of the two nations can be renegotiated On a more theoretical level the book reflects on the role of literature in particular the novel as a transnational medium as a bridge between nations in a period of globalization With its focus on cross cultural connections the book will be of interest to anyone studying or researching comparative literature US Iran relations and cultural studies generally *Danforth's Obstetrics and Gynecology* Ronald S. muckracking utilizing raw elements from nature to establish deeper contact with the primal resources of their world and expose its unfettered contamination Providing a comparative assessment of more than seventy works of art this study reveals Japanese artists engagement with a richly diverse repertoire of earthy materialities elucidating their aesthetic properties changing conditions and cultural significance By focusing on the role of tsuchi as a convergence point for a wide range of creative practices this book offers a critical reassessment of contemporary art in Japan and its intrinsic relationship to the environment Situating art within the context of ecology and urbanization Tsuchi shows artists striving to explore and reprocess raw forms of earth beneath the corruptions of human activity

**Time Travel** David Wittenberg,2016-01-01 This book argues that time travel fiction is a narrative laboratory a setting for thought experiments in which essential theoretical questions about storytelling and by extension about the philosophy of temporality history and subjectivity are represented in the form of literal devices and plots Drawing on physics philosophy narrative theory psychoanalysis and film theory the book links innovations in time travel fiction to specific shifts in the popularization of science from evolutionary biology in the late 1800s through relativity and quantum physics in the mid 20th century to more recent multiverse cosmologies Wittenberg shows how increasing awareness of new scientific models leads to surprising innovations in the literary time machine which evolves from a vehicle used chiefly for sociopolitical commentary into a psychological and narratological device capable of exploring with great sophistication the temporal structure and significance of subjects viewpoints and historical events The book covers work by well known time travel writers such as H G Wells Edward Bellamy Robert Heinlein Samuel Delany and Harlan Ellison as well as pulp fiction writers of the 1920s through the 1940s popular and avant garde postwar science fiction television shows such as The Twilight Zone and Star Trek and current cinema Literature film and TV are read alongside theoretical work ranging from Einstein Schr dinger and Stephen Hawking to G rard Genette David Lewis and Gilles Deleuze Wittenberg argues that even the most mainstream audiences of popular time travel fiction and cinema are vigorously engaged with many of the same questions about temporality identity and history that concern literary theorists media and film scholars and philosophers
