Renewable Energy Organisation for Economic Co-operation and Development, International Energy Agency, 2004 Renewable Energy Market and Policy Trends in IEA Countries reviews the experience of IEA countries after the oil crisis in the 1970s initiated a surge of investments in renewables research and development While use of renewables has grown rapidly they still account for only a small portion of the IEA energy mix Hydropower bioenergy and geothermal energy are

mature technologies that contribute about 5-6% to primary energy supply. Solar, wind, and other new renewables have experienced rapid technology development but as yet they represent only a small share. This work examines policies and measures that have been introduced in IEA countries to increase the cost-effective deployment of renewables, reviews the objectives behind these policies, and evaluates the results. The aim is to identify best practices in order to assist governments in making future policy decisions.

Global Energy Market Trends Anco S. Blazev, 2021-01-07. As discussed in this text, countries with excess energy resources export these to countries that need them. This is an important function of the global energy markets where energy sources, products, and services are traded among countries and companies. While this is the primary activity in energy markets, it is only part of the entire global energy market scheme. The goal of this text is to analyze all sides of the energy markets in their physical, technological, economic, political, regulatory, environmental, financial, and legal aspects.
