Unto Death:

The Sickness Unto Death Søren Kierkegaard, 2004-06-24 One of the most remarkable philosophical works of the nineteenth century *The Sickness Unto Death* is also famed for the depth and acuity of its modern psychological insights Writing under the pseudonym Anti Climacus Kierkegaard explores the concept of despair alerting readers to the diversity of ways in which they may be described as living in this state of bleak abandonment including some that may seem just the opposite and offering a much discussed formula for the eradication of despair With its penetrating account of the self this late work by Kierkegaard was hugely influential upon twentieth century philosophers including Karl Jaspers Jean Paul Sartre and Albert Camus *The Sickness unto Death* can be regarded as one of the key works of theistic existentialist thought a brilliant and revelatory answer to one man's struggle to fill the spiritual void *Faithfulness Unto Death in the Service of Christ*, 1777 *The Sickness Unto Death* Søren Kierkegaard, Anti Climacus, 2014-11-03 Anti Climacus introduces the book with a reference to Gospel of John 11:4 This sickness is not unto death This quotation comes from the story of Lazarus in which Jesus raises a man from the dead However Anti Climacus raises the question would not this statement still be true even if Jesus had not raised Lazarus from the dead While the human conception of death is the end the Christian conception of death is merely another stop along the way of the eternal life In this way for the Christian death is nothing to fear The true *Sickness unto Death* which does not describe physical but spiritual death is something to fear according to Anti Climacus This sickness unto death is what Kierkegaard calls despair According to Kierkegaard an individual is in despair if he does not align himself with God or God's plan for the self In this way he loses his self which Kierkegaard defines as the relation relating itself to itself in the relation Kierkegaard defines humanity as the tension between the finite and infinite and the possible and the necessary and is identifiable with the dialectical balancing act between these opposing features the relation While humans are inherently reflective and self-conscious beings to become a true self one must not only be conscious of the self but also be conscious of being aligned with a higher purpose viz God's plan for the Self When one either denies this Self or the power that creates and sustains this Self one is in despair There are three kinds of despair presented in the book being unconscious in despair of having a self not wanting in despair to be oneself and wanting in despair to be oneself The first of these is described as inauthentic despair because this despair is born out of ignorance In this state one is unaware that one has a self separate from its finite reality One does not realize that there is a God and accepts finitude because one is unaware of possibility of being more inherent in selfhood The second type of despair is refusing to accept the self outside of immediacy only defining the self by immediate finite terms This is the state in which one realizes that one has a self but wishes to lose this painful awareness by arranging one's finite life so as to make the realization unnecessary This stage is loosely comparable to Sartre's bad faith The third type is awareness of the Self but refusal to submit to the will of God In this stage one accepts the eternal and may or may not acknowledge the creator but refuses to accept an aspect of the Self that

one in reality is that is to say the Self that one has been created to be To not be in despair is to have reconciled the finite with the infinite to exist in awareness of one s own self and of God Specifically Kierkegaard defines the opposite of despair as faith which he describes by the following In relating itself to itself and in willing to be itself the self rests transparently in the power that established it **The Religion of Existence** Noreen Khawaja,2016-12-02 What was existentialism At its heart Noreen Khawaja argues existentialism was an effort to translate Protestant piety into a secular philosophy While there have been many attempts to define existentialism from within as a coherent philosophical program and even as a movement Khawaja s book is the first study of existentialism from the standpoint of intellectual history and the first to look systematically at the role that Christianity played in the development of existential thought Focusing on Soren Kierkegaard Martin Heidegger and Jean Paul Sartre Khawaja illuminates the key moments in existentialism s reconstruction of Protestant piety within the confines of secular philosophy Heidegger once described his work as an exercise in the piety of thinking Khawaja s book shows the historical and systematic truth behind this metaphor Notwithstanding Heidegger thinking has not always been a pious act But for a certain group of European intellectuals in the late nineteenth and twentieth centuries it became so The Religion of Existence will appeal to scholars of modern Christianity philosophers and historians of European philosophy as well as those engaged with the theoretical and historical problems of secular and post secular modernity
