Urban Life:

Behavioural and Ecological Consequences of Urban Life in Birds Caroline Isaksson, Amanda D. Rodewald, Diego Gil, 2018-06-19 Urbanization is next to global warming the largest threat to biodiversity. Indeed, it is becoming increasingly evident that many bird species get locally extinct as a result of urban development. However, many bird species benefit from urbanization, especially through the abundance of human-provided resources and increase in abundance and densities. These birds are intriguing to study in relation to their resilience and adaptation to urban environments but also in relation to their susceptibility and the potential costs of urban life. This Research Topic, consisting of 30 articles (one review, two meta-analyses, and 27 original data papers), provides insights into species and population responses to urbanization through diverse lenses including biogeography, community ecology, behaviour, life history, evolution, and physiology.

Urban Geography Michael Pacione, 2009 This is the most comprehensive and readable book on urban geography in the array of contemporary literature on the subject.

The Sphinx in the City Elizabeth Wilson, 1992-03-10 Elizabeth Wilson's elegant, provocative, and scholarly study uses fiction, essays, film, and art as well as history and sociology to look at some of the world's greatest cities: London, Paris, Moscow, New York, Chicago, Lusaka, and São Paulo. It presents a powerful critique of utopian planning, anti-urbanism, postmodernism, and traditional architecture. For women, the city offers freedom, including sexual freedom, but also new dangers. Planners and reformers have repeatedly attempted to regulate women and the working class and ethnic minorities by means of grandiose utopian plans, nearly destroying the richness of urban culture. City centers have become uninhabited business districts; the countryside suburbanized. There is danger without pleasure, consumerism without choice, safety without stimulation. What is needed is a new understanding of city life, and Wilson gives us an intriguing introduction to what this might be.

Cities and Urban Life John J. Macionis, Vincent N. Parrillo, 2017 For courses in Urban Sociology. A comprehensive overview of classic and contemporary urban sociology, *Cities and Urban Life* provides an introduction to the study of urban environments around the world. Using an approach that is multidisciplinary but fundamentally sociological, authors John Macionis and Vincent Parrillo help students see how cities have evolved over time, how cities reflect culture, and where the urban story may take us next. The inclusion of the latest data and research references throughout the seventh edition, as well as updated case studies on a variety of cities, ensures that students come away with an up-to-date understanding of contemporary urban life.

Development In Modern Africa Martin S. Shanguhya, Toyin Falola, 2019-10-08 *Development in Modern Africa: Past and Present Perspectives* contributes to our understanding of Africa's experiences with the development process. It does so by adopting a historical and contemporary analysis of this experience. The book is set within the context of critiques on development in Africa that have yielded two general categories of analysis: skepticism and pessimism. While not overlooking the shortcomings of development, the themes in the book express an optimistic view of Africa's development experiences, highlighting elements that can be tapped into to enhance the condition.

of African populations and their states By using case studies from precolonial colonial and postcolonial Africa contributors to the volume demonstrate that human instincts to improve material social and spiritual words are universal They are not limited to the Western world which the term and process of development are typically associated with Before and after contact with the West Africans have actively created institutions and values that they have actively employed to improve individual and community lives This innovative spirit has motivated Africans to integrate or experiment with new values and structures challenges and solutions to human welfare that resulted from contact with colonialism and the postcolonial global community The book will be of interest to academics in the fields of history African studies and regional studies

Corporations Eugene McQuillin, 1928 *The Changing American Countryside* Emery N. Castle, 1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life
