copyrighted by Book News Inc Portland OR *THE TRANSITION OF DANWEI-COMMUNITY AND URBAN COMMUNITY REBUILDING* Tian Yi-Peng, 2021-11-18 In this work the author endeavors to treat Danwei system as a special and highly organized form of community and sets about his study from the perspectives of Danwei community's change and urban community reconstruction. When it comes to the construction and development of urban communities in contemporary China, academic circles at home often attempt to unravel its intimate and indissoluble connection with Danwei system and seek to lay emphasis upon the great complexity of their interactive relationship with each other. However, academic circles generally incorporate Danwei system taken as a national system as well as a universal institution into their fields of research, whereas they rarely enter into a critical examination of the variations in its multiplicity of specific denotations by taking account of such variables as space, region, and culture, nor do they show much concern about the existence of different types of Danwei. In view of the foregoing difficulties in which the study of Danwei system gets entangled, this study attempts to accomplish the following main purposes. Firstly, this study shall introduce such a variable as locality into the research on Danwei community by starting off from the research perspectives of Danwei community's origin, formation, and change. Secondly, several super-large industrial communities in the old industrial bases shall be chosen as classic cases in illustration of long-standing complications and entanglements enmeshed in this study. And thirdly, it seeks to reveal the mode and experience of urban community development against a background of Danwei system reform, so that by gaining a full understanding of as well as making an in-depth analysis of their rich implications, we can enrich the theory of urban community construction in the Chinese context and hence grapple successfully with some theoretical problems confronting urban community reconstruction against a background of Danwei community change, which shall eventually bring about a smooth transition of Danwei society. This book will assuredly open an exceptional window to the transition of China from traditional to modern society, the transition of Chinese society from planned economy to market economy, and the change track of the interplay between the Chinese government and modern Chinese society after the founding of New China in 1949 at the present time and even in the foreseeable future.

The Politics of Participation in Urban Communities during the COVID-19 Crisis Jan Robert R. Go, 2026-01-01 This book focuses on the politics of participation in urban communities during the pandemic, using the cases of two urban communities in Wuhan, China, and Quezon City, Philippines. It is primarily concerned with the theory of political participation. Rooted on the theoretical puzzles of power and participation, the author argues that the dominant view on political participation poses a limitation on what constitutes political participation and recasts it by arguing that the act of participation or non-participation already has a political meaning or implication. In doing so, the book proposes the politics of participation framework, which emphasizes three aspects: 1. construction of power, 2. dynamics of participation, and 3. narratives of power participation. Through the experiences of urban communities during the pandemic, these three components are argued to contribute to our understanding of the politics of participation vis-à-vis political participation.

The City Alan S.
