**International Organization in the Anarchical Society** Tonny Brems Knudsen, Cornelia Navari, 2018-05-23 This book takes up one of the key theoretical challenges in the English School's conceptual framework namely the nature of the institutions of international society It theorizes their nature through an analysis of the relationship of primary and secondary levels of institutional formation so far largely ignored in English School theorizing and provides case studies to illuminate the theory Hitherto the School has largely failed to study secondary institutions such as international organizations and regimes as autonomous objects of analysis seeing them as mere materializations of primary institutions Building on legal and constructivist arguments about the constitutive character of institutions it demonstrates how primary institutions frame secondary organizations and regimes but also how secondary institutions construct agencies with capacities that impinge upon and can change primary institutions Based on legal and constructivist ideas it develops a theoretical model that sees primary and secondary institutions as shared understandings enmeshed in observable historical processes of constitution reproduction and regulation

**The real rebalancing : American diplomacy and the tragedy of President Obama's foreign policy** John R. Deni, 2015 American security policy rests on a three legged stool consisting of defense diplomacy and development As President Obama implied in his May 2014 speech at West Point the United States is in the midst of a resurgence of diplomacy and development as it seeks to leverage diplomatic influence foreign aid and multilateral institutions to solve the most vexing international security challenges However the dramatic rebalance toward diplomacy and development over the last several years has largely failed Rhetoric official strategies and actual policies have all aimed at rebalancing the three legs of the foreign policy stool However several factors point to a continued militarization of U S foreign policy including funding levels legal authorities and the growing body of evidence that civilian agencies of the U S Government lack the resources skills and capabilities to achieve foreign policy objectives Continued reliance by senior decisionmakers at both ends of Pennsylvania Avenue on the U S military in the development planning and implementation of U S foreign policy has significant implications Foremost among them is the fact that the military itself must prepare for a future not terribly unlike the very recent past Publisher's web site
