Knowledge Together Addressing Climate Change through Innovative Place Based Education and Blended Learning is the
official name of the Erasmus Strategic Partnership project shortly EduChange The project aimed to innovate our way of
teaching about Climate Change in both local and global perspectives via the field course methodology It brought together
students and teachers from four European universities University of Malta Utrecht University the Netherlands Norwegian
University of Science and Technology Trondheim Norway and Palacky University Olomouc Czechia with an idea that teaching
and learning in the field is often rather traditional and teacher led Through EduChange we wanted to transform field courses
into innovative creative learning environments in which teachers students and pupils can create knowledge together We
believe that supporting innovation and creativity can be achieved via international partnerships and inter and trans dis
ciplinary approaches This book presents the overall methodology used during the EduChange project **Creating**
Significant Learning Experiences L. Dee Fink,2003-06-17 Dee Fink poses a fundamental question for all teachers How can
I create courses that will provide significant learning experiences for my students In the process of addressing this question
he urges teachers to shift from a content centered approach to a learning centered approach that asks What kinds of learning
will be significant for students and how can I create a course that will result in that kind of learning Fink provides several
conceptual and procedural tools that will be invaluable for all teachers when designing instruction He takes important
existing ideas in the literature on college teaching active learning educative assessment adds some new ideas a taxonomy of
significant learning the concept of a teaching strategy and shows how to systematically combine these in a way that results in
powerful learning experiences for students Acquiring a deeper understanding of the design process will empower teachers to
creatively design courses for significant learning in a variety of situations **Resources in Education** ,1994 **Journal of**
