Zipf, 2007 Zipf focuses on five gifted women in various parts of the country In San Diego Hazel Wood Waterman parlayed her Arts and Crafts training into a career in architecture Cincinnati's Mary Louise McLaughlin expanded on her interest in Arts and Crafts pottery by inventing new ceramic technology New York's Candace Wheeler established four businesses that used Arts and Crafts production to help other women earn a living In Syracuse both Adelaide Alsop Robineau and Irene Sargent were responsible for disseminating Arts and Crafts related information through the movement's publications Each woman's story is different but each played an important part in the creation of professional opportunities for women in a male dominated society

Women art workers and the Arts and Crafts movement Zoë Thomas, 2020-05-15 This book constitutes the first comprehensive history of the network of women who worked at the heart of the English Arts and Crafts movement from the 1870s to the 1930s Challenging the long standing assumption that the Arts and Crafts simply revolved around celebrated male designers like William Morris it instead offers a new social and cultural account of the movement which simultaneously reveals the breadth of the imprint of women art workers upon the making of modern society Thomas provides unprecedented insight into how women navigated authoritative roles as art workers by asserting expertise across a range of interconnected cultures from the artistic to the professional intellectual entrepreneurial and domestic Through examination of newly discovered institutional archives and private papers Thomas elucidates the critical importance of the spaces around which women conceptualised alternative creative and professional lifestyles **Meet the All-Craft Women** All-Craft

Foundation, 1977 *Feminist Subjectivities in Fiber Art and Craft* John Corso-Esquivel, 2019-07-09 This book interprets the fiber art and craft inspired sculpture by eight US and Latin American women artists whose works incite embodied affective experience Grounded in the work of Gilles Deleuze and Félix Guattari John Corso Esquivel posits craft as a material act of intuition The book provocatively asserts that fiber art long disparaged in the wake of the high low dichotomy of late Modernism is in fact well positioned to lead art at the vanguard of affect theory and twenty first century feminist subjectivities *Design Discourse* Victor Margolin, 1989-09-15 The editor has gathered together a body of writing in the emerging field of design studies The contributors argue in different ways for a rethinking of design in the light of its cultural significance and its powerful position in today's society The collection begins with a discussion of the various expressions of opposition to the modernists purist approach toward design Drawing on postmodernist theory and other critical strategies the writers examine the relations among design technology and social organization to show how design has become a complex and multidisciplinary activity The second section provides examples of new methods of interpreting and analysing design ranging from rhetoric and semiotics to phenomenology demonstrating how meaning is created visually A final section related to design history shifts its emphasis to ideological frameworks such as capitalism and patriarchy that establish

boundaries for the production and use of design
