Algorithms in Advanced Artificial Intelligence R. N. V. Jagan Mohan, B. H. V. S. Rama Krishnam Raju, V. Chandra Sekhar, T. V. K. P. Prasad, 2025-05-23 *Algorithms in Advanced Artificial Intelligence* is a collection of papers on emerging issues, challenges, and new methods in Artificial Intelligence, Machine Learning, Deep Learning, Cloud Computing, Federated Learning, Internet of Things, and Blockchain technology. It addresses the growing attention to advanced technologies due to their ability to provide paradigmatic solutions to problems associated with classical Artificial Intelligence frameworks. AI is used in various subfields including learning, perception, and financial decisions. It uses four strategies: Thinking Humanly, Thinking Rationally, Acting Humanly, and Acting Rationally. The authors address various issues in ICT including Artificial Intelligence, Machine Learning, Deep Learning, Data Science, Big Data Analytics, Vision, Internet of Things, Security, and Privacy aspects in AI and Blockchain and Digital Twin Integrated Applications in AI. Neural Mechanisms Underlying Movement-Based Embodied Contemplative Practices Laura Schmalzl, Catherine E. Kerr, 2016-07-05 Relative to the extensive neuroscientific work on seated meditation practices, far less studies have investigated the neural mechanisms underlying movement-based contemplative practices such as yoga or tai chi. Movement-based practices have however been found to be effective for relieving the symptoms of several clinical conditions and to elicit measurable changes in physiological, neural, and behavioral parameters in healthy individuals. An important challenge for neuroscience is therefore to advance our understanding of the neurophysiological and neurocognitive mechanisms underlying these observed effects, and this Research Topic aims to make a contribution in this regard. It showcases the current state of the art of investigations on movement-based practices including yoga, tai chi, the Feldenkrais Method, as well as dance. Featured contributions include empirical research, proposals of theoretical frameworks, as well as novel perspectives on a variety of issues relevant to the field. This Research Topic is the first of its kind to specifically attempt a neurophysiological and neurocognitive characterization that spans multiple mindful movement approaches, and we trust it will be of interest to basic scientists, clinical researchers, and contemplative practitioners alike. **The varieties of contemplative experiences and practices** Sucharit Katyal, Sisir Roy, Philippe R. Goldin, Anna-Lena Lumma, 2023-07-05 **Teaching and Learning in Ecosocial Work** Catherine Forde, Satu Ranta-Tyrkkö, Pieter Lievens, Komal Singh Rambaree, Helena Belchior-Rocha, 2024-09-10 This book aims to champion teaching and learning of ecosocial work in educational institutions which offer social work and related programmes. It is the first book to focus specifically on teaching and learning in ecosocial work and one of the first to incorporate student perspectives on and initiatives in ecosocial work, teaching, learning, and practice. Ecosocial work is an evolving framework to learn about and practice social work from the premise that humans are part of the web of life on Earth. While this understanding should guide human activities, current planetary-scale anthropogenic socio-environmental problems such as the climate crisis, ocean acidification, biodiversity, and species loss, prove the opposite. Social work and allied

professions stem from the same anthropocentric world view and need to reconfigure their relationship to other than humans and the planetary limits of existence This requires in depth renewal of social work and related professions and an ecosocial ecological paradigm change in which education is pivotal Written by academics students and practitioners working in different parts of the world and offering interdisciplinary perspectives the book provides Chapters and case studies on concepts methods and experiences of teaching and learning in ecosocial work Discussion of the current terrain of ecosocial work in principle and practice Ideas on the kinds of new thinking ecosocial work requires and on how these can be taught and practiced promoting economic social and environmental sustainability This book makes an original and internationally acclaimed contribution to ecosocial work education As the conduit for preparing social workers to become active agents of ecosocial change critical attention is given to the importance of education as foundational to this professional endeavour This book provides essential reading for all social work professionals scholars educators and learning institutions Heather Boetto Associate Professor Charles Stuart University Australia A comprehensive book about the challenges and opportunities of teaching the ecosocial framework in social work Various perspectives open up new possibilities for understanding the practices of teaching ecosocial work in different contexts A strong reading recommendation for anyone interested in understanding and teaching the relationship between social work and environmental issues Kati N rhi Professor University of Jyv skyl Finland
