A Beginner's Guide to Green Building, 2005

Green Building Anthony C. Floyd, Allan Bilka, 2012

The cutting edge green building projects of today are quickly becoming standard practice for tomorrow. In order for industry professionals to keep up with this trend they'll need to have a solid grasp on green building and the technologies, market forces, and governmental policies that drive it.

Green Building A Professional's Guide to Concepts, Codes, and Innovation is designed for those seeking a better understanding of current design and building performance issues. Coverage includes straightforward explanations of how buildings and ecosystems can work together, as well as the sustainability concerns inspiring current regulations. Relevant codes and standards are discussed in depth with particular attention to the International Green Construction Code. Knowledge is essential for environmentally appropriate and efficient building solutions. Readers of this book will have a better understanding of where the building industry is headed and how to become compliant with green practices and regulations.

Understanding Green Building Guidelines: For Students and Young Professionals Traci Rose Rider, 2010-02-17

Summarizes the main issues and strategies of the forceful and fast-paced green building movement. Many professions are increasingly producing tools to assist clients in breaking down and understanding the different elements that reside under the umbrella of the sustainability movement. For the design and construction professions, this unpacking often takes the form of green building guidelines and rating systems. This book aims to look at a selection of both national and local green building rating systems and guidelines ranging from commercial to residential. While the goal is to provide students and young professionals with a solid overview of each product, enabling them to understand the differences and select the most appropriate system for their chosen projects, the book provides valuable overviews and comparisons for anyone interested in better buildings: designers, homeowners, realtors, contractors, facility managers, site designers, and more.
