The Analysis Of Ghost In The Shell:

The Analysis of Ghost in the Shell ; based on manga by Shirow Masamune Tohru Nozaki,1995 **Liquid Metal** Sean Redmond,2004 This reader brings together a great number of what are regarded to be the seminal essays that have opened up the study of science fiction to serious critical interrogation It includes key essays by writers such as J P Telotte Susan Sontag and Peter Biskind **Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond** Tombul, Işıl,Sarı, Gülşah,2021-05-28 Orientalism is about much more than just information gathered about the East within its general postcolonial period In this period orientalism is a Western discourse that dominated and shaped the view of the East There is otherization in the way the West has historically looked at the East and within the information presented about it These original stories of travelers in the past and previous telling about the East are facing a reconstruction through modern types of media Cinema television news newspaper magazine internet social media photography literature and more are transforming the way the East is presented and viewed Under the headings of post orientalism neo orientalism or self orientalism these new orientalist forms of work in combination with both new and traditional media are redefining orientalism in the media and beyond The Handbook of Research on Contemporary Approaches to Orientalism in Media and Beyond shows how both new media and traditional media deal with orientalism today through the presentation of gender race religion and culture that make up orientalist theory The chapters focus on how orientalism is presented in the media cinema TV photography and more This book is ideal for communications theorists media analysts practitioners researchers academicians and students working in fields that include mass media communications film studies ethnic studies history sociology and cultural studies *Technology and ethnicity in American Studies* Alina Degünther,2022-01-27 The technological imagery of twentieth century literature reveals that the profound fusion of technology with the human body altered the way people considered their bodies In this period a special attention was drawn to the representation of ethnic bodies such as African Americans Latino Americans or Asian Americans through technology The study of technology and ethnicity is relevant to American Studies because it highlights the nature of technology which can be gendered or racialized Historically mainstream American fiction can be identified as colorblind because it has produced racial stereotypes of the ethnic others depicting them as inferior to the whites For example Ridley Scott s film Blade Runner 1982 or Larry and Andy Wachowski s the Matrix 1999 reveal how the ethnic bodies of African Americans or Asian Americans can be marginalized and objectified through technological means in fiction Most of the analysis of ethnicity in this fiction has been done within postcolonial theory but less attention has been drawn to critical race theory This paper intends to analyze the popular representation of Asians and Asian Americans as cyborgs and technological beings in William Gibson s cyberpunk novel Neuromancer 1984 Mamoru Oshii s cyberpunk film Ghost in the Shell 1995 and Larissa Lai s post cyberpunk novel Salt Fish Girl 2002 within critical race theory These speculative fictions represent images of Asians and Asian Americans as cyborgs

and technological objects at the same time questioning and challenging the issues of ethnicity gender and ethnic identity representation in fiction While Gibson an American mainstream fiction writer provides exotic images of Asian cyborgs the Japanese writer Oshii and the ethnic writer Lai use cyborgs in their narratives to address the issues of white supremacy and marginalization of ethnic bodies

Science Fiction Studies ,2000 [My Kind of Sound](#) Enrique Encabo,2020-11-24 This volume explores the importance and significance that music has in our lives The relationship between music and identity is based on conceptions about meanings and identification especially powerful when connected with youth and popular music We narrate ourselves in a musical way and we must study music as culture rather than music in culture The contributions to this book attend to emerging phenomena such as the rise of the Reggaeton music around the world the importance of music in anime media and music industry changes and uncertainties in the new millennium Music is art but it is also an industry and a business and the two are intertwined through the sale of tickets original formulas are obtained and in the same way products not just musical but multimedia are born from alternative culture eventually becoming mainstream In addition this book also takes into account iconic artists such as Nirvana David Bowie or Miley Cyrus and the important contribution of music to the narrative and success of popular TV series analysing cases such as Babylon Berlin and Vikings From Blade Runner 1982 to current television mainstream productions the music image alliance does not only satisfy and distract us but also challenges us and forces us to rethink our view of the world
