

The Arms Race

Herbert Frank York

The Arms Race:

The Arms Race Anita Croy, 2019-07-15 Arms races are often associated with the Cold War but they are still a reality around the world today. Issues such as military aggression and nuclear weapons are complex but they are presented to readers in an accessible way. A fact-filled main text, engaging full-color photographs, and helpful graphic organizers richly present details about the arms race. Readers are challenged to think for themselves about international arms races as they explore discussion questions and are asked to compare and contrast the viewpoints of experts. Although news stories about weapons and wars might seem frightening to young people, this volume stresses the importance of facts over fearmongering.

Arms Races in International Politics Thomas G. Mahnken, Joseph Maiolo, David Stevenson, 2016 This volume provides the first comprehensive history of the arms racing phenomenon in modern international politics, drawing both on theoretical approaches and on the latest historical research. Written by an international team of specialists, it is divided into four sections: before 1914, the interwar years, the Cold War, and extra-European and post-Cold War arms races. Twelve case studies examine land and naval armaments before the First World War, air, land, and naval competition during the 1920s and 1930s, and nuclear as well as conventional weapons since 1945. Armaments policies are placed within the context of technological development, international politics and diplomacy, and social politics and economics. An extended general introduction and conclusion, and introductions to each section, provide coherence between the specialized chapters and draw out wider implications for policymakers and for political scientists. *Arms Races in International Politics* addresses two key questions: what causes arms races, and what is the connection between arms races and the outbreak of wars.

[March to Armageddon](#) Ronald E. Powaski, 1987 Ronald E. Powaski offers the first complete, accessible history of the events, forces, and factors that have brought the world to the brink of a nuclear holocaust. He traces the evolution of the nuclear arms race from FDR's decision to develop an atomic bomb to Reagan's decision to continue its expansion in the 1980s. Focusing on the forces that have propelled the arms race and the reasons behind the repeated failures to check the proliferation of nuclear weapons, Powaski discusses such topics as the Manhattan Project, the decision to drop the bomb on Hiroshima, the debate over whether to share atomic information, the effect of nuclear weapons on U.S. military and foreign policy, and the role of these weapons in arms control negotiations in the last five presidential administrations.
