Philosophical Magazine ,1909 **The London, Edinburgh and Dublin Philosophical Magazine and Journal of
 Science** ,1889 Dance Notations and Robot Motion Jean-Paul Laumond, Naoko Abe, 2015-11-24 How and why to write a
 movement Who is the writer Who is the reader They may be choreographers working with dancers They may be roboticists
 programming robots They may be artists designing cartoons in computer animation In all such fields the purpose is to

express an intention about a dance a specific motion or an action to perform in terms of intelligible sequences of elementary movements as a music score that would be devoted to motion representation Unfortunately there is no universal language to write a motion Motion languages live together in a Babel tower populated by biomechanists dance notators neuroscientists computer scientists choreographers roboticists Each community handles its own concepts and speaks its own language The book accounts for this diversity Its origin is a unique workshop held at LAAS CNRS in Toulouse in 2014 Worldwide representatives of various communities met there Their challenge was to reach a mutual understanding allowing a choreographer to access robotics concepts or a computer scientist to understand the subtleties of dance notation The liveliness of this multidisciplinary meeting is reflected by the book thank to the willingness of authors to share their own experiences with others
