Dance Notations and Robot Motion
Jean-Paul Laumond, Naoko Abe, 2015-11-24 How and why to write a movement Who is the writer Who is the reader They may
be choreographers working with dancers They may be roboticists programming robots They may be artists designing
cartoons in computer animation In all such fields the purpose is to express an intention about a dance a specific motion or an
action to perform in terms of intelligible sequences of elementary movements as a music score that would be devoted to
motion representation Unfortunately there is no universal language to write a motion Motion languages live together in a
Babel tower populated by biomechanists dance notators neuroscientists computer scientists choreographers roboticists Each
community handles its own concepts and speaks its own language The book accounts for this diversity Its origin is a unique
workshop held at LAAS CNRS in Toulouse in 2014 Worldwide representatives of various communities met there Their
challenge was to reach a mutual understanding allowing a choreographer to access robotics concepts or a computer scientist
to understand the subtleties of dance notation The liveliness of this multidisciplinary meeting is reflected by the book thank
to the willingness of authors to share their own experiences with others
