Typography Advertising Design:

Advertising Design and Typography Alex W. White, 2015-09-01 This comprehensive overview of advertising design strategies helps students and professionals understand how to create ads that cut through the clutter. Design principles such as unity, contrast, hierarchy, dominance, scale, abstraction, and type-image relationships are thoroughly discussed. Chapters also cover researching your client and your audience, what makes an ad successful, getting the audience's attention in a crowded marketplace, the importance of consistent branding and identity, the difference between print advertising (billboards, the web, television, and radio), advertising design versus editorial design. Also included is an extensive section on typography with essential information on how type is perceived by readers, typographic history, principles, and practice. Complete with over fifteen hundred examples and illustrations of outstanding advertising design from around the world, *Advertising Design and Typography* will change the way you develop visual ideas and train you to see in a more critical and accurate way that gets messages across more effectively. Banks, 2005-06-13 This book is an overview of the

process of design as it has evolved from the earliest visual images and artifacts from prehistory to our modern practice of design Originally written as a textbook for design students and design professionals it is also oriented to the general public interest in the design arts and the fine arts Every object has a story to tell about its period in time its culture its maker and ways of making This thought was the idea behind the making of this book that we can read this story through the interpretation of the forms of objects Important influences on modern design have come from the Bauhaus and the French decorative arts However what the designer does is best expressed in the work of American industrial designer Norman Bel Geddes Excerpt page 55 Bell Geddes believed that design is primarily a matter of thinking and of envisioning how the customer would use the product While every product has a specific solution Bel Geddes instituted market research as an essential part of the design process In his redesign of the counter scale for the Toledo Scale Company he changed hand weights to a spring mechanism cast iron to aluminum enclosed the skeleton body in a white enamel shell and made the scale flush with the counter for ease of use while retaining its basic function Bel Geddes major innovation was the redesign of the Standard gas stove from a stylized furniture form to a single unit encased in clean white enamel Rethinking the stove as a skyscraper grid hung with steel plates he simplified the manufacturing process by creating twelve interchangeable components to form sixteen different models Source Norman Bel Geddes Horizons
