Ufos Search For The Unknown:

Search for the Unknown Matthew Hayes,2022-04-15 Beginning in the 1950s alleged sightings of unidentified flying objects in Canadian skies bred tension between the state and its citizens While the public demanded to know more about the phenomenon government officials appeared unconcerned and unresponsive Suspicion of government deepened among certain sectors of Canadian society in the decades that followed leading to demands for greater public transparency and a new kind of citizen activism In *Search for the Unknown* Matthew Hayes uncovers the history of the Canadian government's investigations into reports of UFOs revealing how these reports were handled deflected and defended from 1950 to the 1990s During this period Canadians filed more than 5 000 reports of UFO sightings many with striking descriptions and illustrations with branches of government and law enforcement Although the government conducted some exploratory studies officials were unable to solve the mystery of UFOs or provide satisfactory answers about their alleged existence and they soon declared the matter closed Dissatisfied citizens responded by taking matters into their own hands starting UFO clubs and civilian investigation groups and accusing the government of a cover up A mutual mistrust developed between citizens who were suspicious of their government and officials who dismissed their fears and anxieties This provided fertile ground for anti authoritarian attitudes and the cultivation of conspiracy theories In an era of political division and amid heightened awareness of states responsibilities for their citizens *Search for the Unknown* reveals the challenges that governments face in responding to public anxieties and preserving trust in public institutions

Identified Flying Objects Dr. Michael P. Masters,2019-03-22 Could UFOs and Aliens simply be us but from the future This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past Dr Michael P Masters a professor of biological anthropology specializing in human evolutionary anatomy archaeology and biomedicine explores how the persistence of long term biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc shaped craft which are likely the very devices that allow our future progeny to venture backward across the landscape of time Moreover these extraterrestrials are ubiquitously described as bipedal large brained hairless human like beings who communicate with us in our own languages and who possess technology advanced beyond but clearly built upon our own These accounts coupled with a thorough understanding of the past and modern human condition point to the continuation of established biological and cultural trends here on Earth long into the distant human future

UFOs and the Extraterrestrial Contact Movement: Unidentified flying objects George M. Eberhart,1986

UFO Stephen Gildust,2025-06-10 As a ufologist I find the times we live in incredibly exciting Many recent events point to UFOs and their presence here on Earth Yes I am a firm believer in the existence of UFOs and I am entirely convinced that these phenomena are happening right now on Earth as well as having occurred far back in time There are simply too many stories sightings autopsies and other unexplained events throughout history to dismiss them However I had my own personal experience In the early 1970s during a field trip with my entire school class we witnessed a UFO up close A classic flying saucer slowly and safely hovered a few meters above the treetops We witnessed this phenomenon about 100 meters away in the open field watching for about 10 15 seconds The speed of the aircraft was probably similar to how quickly you or I would run the same 600 feet distance It was a spring morning with normal weather This experience ignited my interest in UFOs and after that I became fully convinced of the existence of this phenomenon That said I am also critical of various TV series books and other media that sensationalize these topics Not everything thats labeled as an alien encounter or UFO sighting is what it seems There are often many possible explanations for these phenomena But what would happen globally if all governments went public and said that UFOs and aliens exist Mass hysteria would probably break out immediately and the stock markets and the economy would collapse with people taking to the streets armed with guns Or do you think it would play out differently I wish you good luck as you dive into this book and hope it gives you something to ponder Bonus material over 120 observations through history

UFOs and Government Michael D. Swords,2012 Governments around the world have had to deal with the UFO phenomenon for a good part of a century How

and why they did so is the subject of UFOs and Government a history that for the first time tells the story from the perspective of the governments themselves It s a perspective that reveals a great deal about what we citizens have seen and puzzled over from the outside for so many years The story which is unmasked by the governments own documents explains much that is new or at least not commonly known about the seriousness with which the military and intelligence communities approached the UFO problem internally Those approaches were not taken lightly In fact they were considered matters of national security At the same time the story reveals how a subject with such apparent depth of experience and interest became treated as if it were a triviality And it explains why one government the United States government deemed it wise and perhaps even necessary to treat it so Though the book focuses primarily on the U S government s response to the UFO phenomenon also included is the treatment of the subject by the governments of Sweden Australia France Spain and other countries This large format fully illustrated book is the result of a team effort that called itself The UFO History Group a collection of veteran UFO historians and researchers who spent more than four years researching consulting writing and editing to present a work of historical scholarship on government response to the UFO phenomenon Michael Swords was the primary author of the United States chapters The work was coordinated and edited by Robert Powell Clas Svahn Vicente Juan Ballester Olmos Bill Chalker and Robert Powell contributed country chapters Jan Aldrich was the primary content consultant with additional content consultation and writing coming from Barry Greenwood and Richard Thieme Steve Purcell was the primary photo illustration editor From the foreword by Jerome Clark While UFOs and Government revisits an often unhappy history the reading of it is far from an unhappy experience The authors eloquent intelligent sophisticated and conscientious provide us with the first credible comprehensive overview of official UFO history in many years Most of the current volume deals with U S military and intelligence responses to the UFO phenomenon but it also features richly informative chapters that expand the story across the international arena If you re looking for an example of a nation that dealt productively with the UFO reports that came its official way you will take heart in the chapter on the French projects From here on every responsible treatment of UFOs and government will have to cite UFOs and Government prominently among its sources this is the real story as accurately as it can be reconstructed in the second decade of the new century I expect to keep my copy close at hand and to return to it often While it cannot be said of many books UFO themed or otherwise this is among the essential ones Stray from it at your peril
