*Capacity Mechanisms in the EU Energy Markets* Leigh Hancker, Adrien de Hauteclocque, Kaisa Huhta, Malgorzata Sadowska, 2022-10-13 Capacity remuneration mechanisms or simply capacity mechanisms have become a fact of life in member states energy markets and are one of the hottest topics in the wider European regulatory debate Concerned about the security of electricity supply national governments are implementing subsidy schemes to encourage investment in conventional power generation capacity alongside already heavily subsidized renewable energy sources With the increasingly connected European electricity markets the introduction of a capacity mechanism in one country not only tends to distort its national market but may also have unforeseeable consequences for neighbouring electricity markets As these mechanisms are adopted by member states with limited supra national coordination as well as consideration for the cross border impact

they tend to cause serious market distortions and put the future of the European internal electricity market at risk This second edition will take stock of how capacity mechanisms have actually worked so far and consider the consequences they have for the European internal electricity market It will include a detailed overview of national capacity mechanisms their implications for the EU internal market and will outline the nature of market failures which are likely to occur in the European electricity markets This edition is intended to serve as a point of reference for regulators and policy makers on how to design optimal capacity mechanisms in Europe It will be an invaluable resource for anyone interested in energy market design regulation and competition issues

**EU Soft Law in the Member States** Mariolina Eliantonio, Emilia Korkea-aho, Oana Stefan, 2021-03-25 This volume analyses for the first time in European studies the impact that non legally binding material otherwise known as soft law has on national courts and administration The study is founded on empirical work undertaken by the European Network of Soft Law Research SoLaR across ten EU Member States in competition policy financial regulation environmental protection and social policy The book demonstrates that soft law is taken into consideration at the national level and it clarifies the extent to which soft law can have legal and practical effects for individuals and national authorities The national case studies highlight the points of convergence or divergence in the way in which judges and administrators approach soft law while reflecting on the reasons for and consequences of various national practices A series of horizontal studies connect this research to the rich literature on new modes of governance by revisiting traditional theories on soft law and by reflecting on the potential of such instruments to undermine or to foster rule of law values
