Units Of Lovers:

The Way of Lovers: The Oxford Anonymous Commentary on the Song of Songs (Bodleian Library, MS Opp. 625) Sara Japhet, Barry Dov Walfish, 2017-06-12 This extraordinary commentary by a late twelfth century anonymous northern French exegete interprets the Song of Songs solely according to its plain meaning as a story of two young lovers and their developing relationship The exegete pays attention to every detail of the text offering many enlightening insights into its meaning all the while expanding upon the way of lovers the ways that young people in love go about their lovemaking The French background of the exegete is made clear by numerous references to knights coats of arms weapons chivalry and of course wine drinking The edition is accompanied by an English translation and extensive introduction which analyzes the various linguistic literary and exegetical features of the text *The Unit*, 1897 *Close Encounters* Andrew Davison, 2025-03-25 What would it look like to approach data with the care and attentiveness that we bring to a poem Andrew Davison proposes a new philosophy of data modeled on the affective and ethical qualities of the encounter between a reader and a literary text and demonstrates its significance for understanding urgent social and political issues In a cross disciplinary engagement with philosophical literary and political theoretical accounts of poetic experience *Close Encounters* challenges the philosophical underpinnings of dominant approaches to data analysis Instead Davison argues social scientists should treat their data with the same close attention and ethical responsibility that are accorded to literary texts In this view quantitative and qualitative data are not only collected coded or constructed they are entrusted to the care of their recipient Such attunement yields original insight into silenced erased and neglected subaltern dimensions of the data Davison demonstrates how this methodology provides fresh perspective on pressing topics such as immigration border politics torture war Trumpism violent political speech medical care criminal justice algorithmic governance and the COVID 19 pandemic Bringing together a strikingly original theorization of data with a rich array of examples *Close Encounters* shows why the skills and methods of literary inquiry are essential to ethically sensitive data analysis *The Analogical Mind* Dedre Gentner, Keith J. Holyoak, Boicho N. Kokinov, 2001-03-02 Analogy has been the focus of extensive research in cognitive science over the past two decades Through analogy novel situations and problems can be understood in terms of familiar ones Indeed a case can be made for analogical processing as the very core of cognition This is the first book to span the full range of disciplines concerned with analogy Its contributors represent cognitive developmental and comparative psychology neuroscience artificial intelligence linguistics and philosophy The book is divided into three parts The first part describes computational models of analogy as well as their relation to computational models of other cognitive processes The second part addresses the role of analogy in a wide range of cognitive tasks such as forming complex cognitive structures conveying emotion making decisions and solving problems The third part looks at the development of analogy in children and the possible use of analogy in nonhuman primates Contributors Miriam Bassok Consuelo B Boronat Brian Bowdle Fintan Costello
