Universality And Emergent Computation In Cellular Neural Networks:

Universality And Emergent Computation In Cellular Neural Networks Radu Dogaru, 2003-03-13 Cellular computing is a natural information processing paradigm capable of modeling various biological physical and social phenomena as well as other kinds of complex adaptive systems The programming of a cellular computer is in many respects similar to the genetic evolution in biology the result being a proper cell design and a task specific gene How should one program the cell of a cellular computer such that a dynamic behavior with computational relevance will emerge What are the rules for designing a computationally universal and efficient cell The answers to those questions can be found in this book It introduces the relatively new paradigm of the cellular neural network from an original perspective and provides the reader with the guidelines for understanding how such cellular computers can be programmed and designed optimally The book contains numerous practical examples and software simulators allowing readers to experiment with the various phases of designing cellular computers by themselves

Systematic Design for Emergence in Cellular Nonlinear Networks Radu Dogaru, 2008-02-01 In this insightful work Dogaru proposes a systematic framework for measuring emergence and a systematic design method to locate computationally meaningful genes in a reasonable computing time Programs and application examples are provided so that the reader may easily understand the new concepts and develop her own specific experiments The book's approachability recommends it to a large audience including specialists from various interdisciplinary fields

Complex Computing-Networks Izzet Cem Göknaç, Levent Sevgi, 2006-05-31 This book contains the ceremonies and the proceedings pertaining to the International Symposium CCN2005 on Complex Computing Networks A Link between Brain like and Wave Oriented Electrodynamics Algorithms convened at Doğu University of Istanbul Turkey on 13-14 June 2005 in connection with the bestowal of the honorary doctorate degrees on Professors Leopold B Felsen and Leon O Chua for their extraordinary achievements in electromagnetics and nonlinear systems respectively The symposium was co-organized by Cem Göknaç and Levent Sevgi in consultation with Leopold B Felsen and Leon O Chua Istanbul is a city with wonderful natural and historical surroundings a city not only interconnecting Asia and Europe but also Eastern and Western cultures Therefore CCN2005 was a memorable event not only in the lifetime of Drs Felsen Chua and their families but also for all the other participants who were there to congratulate the recipients and participate in the symposium

Control of Homoclinic Chaos by Weak Periodic Perturbations Ricardo Chacón, 2005 This monograph presents a reasonably rigorous theory of a highly relevant chaos control method suppression enhancement of chaos by weak periodic excitations in low dimensional dissipative and non autonomous systems The theory provides analytical estimates of the ranges of parameters of the chaos controlling excitation for suppression enhancement of the initial chaos The important applications of the theory presented in the book include 1 control of chaotic escape from a potential well 2 suppression of chaos in a driven Josephson junction 3 control of chaotic solitons in Frenkel Kontorova chains 4 control of chaotic breather dynamics in perturbed sine

Multi-Valued and Universal Binary Neurons Igor Aizenberg,Naum N. Aizenberg,Joos P.L. Vandewalle,2013-03-14 Multi Valued and Universal Binary Neurons deals with two new types of neurons multi valued neurons and universal binary neurons These neurons are based on complex number arithmetic and are hence much more powerful than the typical neurons used in artificial neural networks Therefore networks with such neurons exhibit a broad functionality They can not only realise threshold input output maps but can also implement any arbitrary Boolean function Two learning methods are presented whereby these networks can be trained easily The broad applicability of these networks is proven by several case studies in different fields of application image processing edge detection image enhancement super resolution pattern recognition face recognition and prediction The book is hence partitioned into three almost equally sized parts a mathematical study of the unique features of these new neurons learning of networks of such neurons and application of such neural networks Most of this work was developed by the first two authors over a period of more than 10 years and was only available in the Russian literature With this book we present the first comprehensive treatment of this important class of neural networks in the open Western literature Multi Valued and Universal Binary Neurons is intended for anyone with a scholarly interest in neural network theory applications and learning It will also be of interest to researchers and practitioners in the fields of image processing pattern recognition control and robotics [Alchemical Libraries Almanack](#) ,2006 *Noise in Complex Systems and Stochastic Dynamics II* Zoltán Gingl,Society of Photo-optical Instrumentation Engineers,2004 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high quality conferences in the broad ranging fields of optics and photonics These books provide prompt access to the latest innovations in research and technology in their respective fields Proceedings of SPIE are among the most cited references in patent literature **A Nonlinear Dynamics Perspective of Wolfram's New Kind of Science** Leon O. Chua,2006 This novel book introduces cellular automata from a rigorous nonlinear dynamics perspective It supplies the missing link between nonlinear differential and difference equations to discrete symbolic analysis The book provides a scientifically sound and original analysis and classifications of the empirical results presented in Wolfram s monumental New Kind of Science
