**The Universe of Light** William Henry Bragg, 1933 *Light in Einstein's Universe* R. Prokhovnik, 2012-12-06 The tremendous progress in astronomical observations over the past sixty years has revealed a vast structured universe whose fundamental parts are galaxies and clusters thereof The interpretation of the new astronomical evidence owes much to Einstein's insights and deductions All our knowledge of the world derives from the light more generally the energy which reaches us from near and far Einstein recognised the vital role of energy as the sole basis of our information about the workings of nature his Special Theory of Relativity showed how our understanding of space and time is linked with measurements involving reflecting light signals He further demonstrated that matter exists in two interchangeable forms a mass form and an energy form which interact closely at all levels His General Theory of Relativity

dealt with the nature of this interaction in the context of gravitational fields and led to a view of the universe which was soon observationally confirmed Einstein's methods and results form the theoretical basis of modern cosmology which has spawned many models of the universe how ever they all deal with an Einstein type universe and they all employ his geometric approach to describe it

THE THEORY OF LIGHT GRAVITY Colin Parkes,2011-01-13 Some discoveries have shaken the world and left their mark in an important way Newton's Theory of Gravity Darwin's Theory of Evolution and Einstein's Theories of Relativity come immediately to mind One thing they have in common is a bold and brave new idea When these new theories are eventually accepted they become pillars of science and more importantly foundations of society Then occasionally a new idea comes along that rattles one of these pillars My new idea should do just that shake but not topple our theory of gravity Hopefully it will bring gravity to the masses not just add more mass to gravity theory It solves

Newton's mystery and Einstein's enigma supports most current gravity theory but adds a new dimension to physics and will become a major part of the new gravity pillar of physics

**UNCOVERING CORRUPT SCIENCE** PSJ (Peet) Schutte, 2013-07-17

Modern science or what I call Newtonian science is altogether wrong Nothing can stand still in the Universe and remain a part of the Universe The Universe is the movement thereof Everything in the Universe has to move should it wish to be and everything in the Universe moves and in circles but everything moves There is no mass but only movement and movement is gravity and gravity is time forming space But how does this system work and how does this system form an entire Universe as big as the one we have Read this and see how the Universe is truly stitched together by nature and not by Newton's fantasy It works exactly as Kepler said it does in the tables Kepler left us to study Space by three forms a circle by two that moves straight by one and that forms the six sided Universe we enjoy as a reality
