University And Military Research:

The University and Military Research Dorothy Nelkin,1972 *University and Military Research* Dorothy Nelkin,2019-06-30 The events leading up to the Massachusetts Institute of Technology s decision to divest the controversial Instrumentation Laboratory are vividly set forth in this engrossing case study The decision announced on May 20 1970 followed a year of efforts to cope with dissent focused on the issue of weapons related research on campus Several key issues are illuminated in the narrative the problems of defining appropriate research and public service policy in universities the social responsibility of scientists and engineers and the complicated relationship between government sponsorship and university research *The Routledge Companion to Military Research Methods* Alison J. Williams,Neil Jenkins,Rachel Woodward,Matthew F. Rech,2016-04-28 This new handbook is about the practices of conducting research on military issues As an edited collection it brings together an extensive group of authors from a range of disciplinary perspectives whose chapters engage with the conceptual practical and political questions raised when doing military research The book considers a wide range of questions around research about on and with military organisations personnel and activities from diverse starting points across the social sciences arts and humanities Each chapter in this volume Describes the nature of the military research topic under scrutiny and explains what research practices were undertaken and why Discusses the author s research activities addressing the nature of their engagement with their subjects and explaining how the method or approach under scrutiny was distinctive because of the military context or subject of the research Reflects on the author s research experiences and the specific often unique negotiations with the politics and practices of military institutions and military personnel before during and after their research fieldwork The book provides a focussed overview of methodological approaches to critical studies of military personnel and institutions and processes and practices of militarisation and militarism In particular it engages with the growth in qualitative approaches to military research particularly research carried out on military topics outside military research institutions The handbook provides the reader with a comprehensive guide to how critical military research is being undertaken by social scientists and humanities scholars today and sets out suggestions for future approaches to military research This book will be of much interest to students of military studies war and conflict studies and research methods in general *How to Investigate Corporate/military Research at Your University!.* Alliance for Democracy (Madison, Wis.),199? *Professional Journal of the United States Army* ,1972 Military Versus Private Industry Versus University Control and Administration of Military Research and Development Edward Eugene Harriman,1957 Australian national bibliography ,1961 Princeton Alumni Weekly ,1954 **The Routledge Handbook of the Political Economy of Science** David Tyfield,Rebecca Lave,Samuel Randalls,Charles Thorpe,2017-04-28 The political economy of research and innovation R I is one of the central issues of the early twenty first century Science and innovation are increasingly tasked with driving and reshaping a troubled global economy while also tackling multiple

overlapping global challenges such as climate change or food security global pandemics or energy security But responding to these demands is made more complicated because R I themselves are changing Today new global patterns of R I are transforming the very structures institutions and processes of science and innovation and with it their claims about desirable futures Our understanding of R I needs to change accordingly Responding to this new urgency and uncertainty this handbook presents a pioneering selection of the growing body of literature that has emerged in recent years at the intersection of science and technology studies and political economy The central task for this research has been to expose important but consequential misconceptions about the political economy of R I and to build more insightful approaches This volume therefore explores the complex interrelations between R I both in general and in specific fields and political economies across a number of key dimensions from health to environment and universities to the military The Routledge Handbook of the Political Economy of Science offers a unique collection of texts across a range of issues in this burgeoning and important field from a global selection of top scholars The handbook is essential reading for students interested in the political economy of science technology and innovation It also presents succinct and insightful summaries of the state of the art for more advanced scholars

Tackling Trident Stellan Vinthagen, Justin Kenrick, Kelvin Mason, 2012 Tackling Trident is about two unique academic conferences in which an international group of academics while discussing scientific conference papers simultaneously blockaded Faslane Naval Base home of the UK's Trident system of nuclear weapons of mass destruction in Scotland in January and June 2007 This book presents the academics that took part in the innovative Academic Conference Blockades the conference papers that outlines the scientific rationale behind their nuclear resistance and the year long campaign Faslane 365 in which this critique in action occurred Tackling Trident is a book written by engaged academics that tackles nuclear weapon issues Trident academic responsibility and possibilities for academic personal and social change This book is a fundamental challenge to the suggested scientific legitimacy of nuclear weapon defence and the suggested political and moral neutrality of academia Back cover

The United States Military and University Research Alan Hall, 2007 Since the beginning the United States has been interested in technological development but only in times of war did it actively pursue the aid of the scientific community Overtime a military academic industrial relationship evolved to meet the technology needs of the military This thesis seeks to chronicle the evolution of this partnership beginning with an explanation of how the pressures of war necessitated cooperation to develop the atomic bomb during World War II The maturation of this relationship during the Cold War will be revealed as the creation of the Internet is discussed Beginning with the colonial period through the Cold War it will show the benefits to both the military and the nation as a whole Producing technologies that would have been impossible to create by any one group this ongoing relationship has allowed the United States to remain a world leader in science and technology development

Scientific Research, 1969 **The Graduate Magazine of the University of Kansas**, 1913 Defense White Paper, 1998 Bulletin of the Atomic Scientists, 1951-04 The Bulletin

of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world

Secret Weapons and World War II Walter E. Grunden,2005 Grunden s analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan s failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East **BOOK JACKET** **The National Union Catalog, Pre-1956 Imprints** ,1968 **University of Iowa Studies in Character** University of Iowa.
