*Conflicts of Law and Morality* Kent Greenawalt, 1989-05-04 Powerful emotion and pursuit of self interest have many times led people to break the law with the belief that they are doing so with sound moral reasons This study a comprehensive philosophical and legal analysis of the gray area in which the foundations of law and morality clash views these oblique circumstances from two perspectives that of the person who faces a possible conflict between the claims of morality and law and must choose whether or not to obey the penal code and that of the people who make and uphold laws and must decide whether to treat someone with a moral claim to disobey differently from ordinary lawbreakers In examining the extent of the obligations owed by citizens to their government Greenawalt concentrates on the possible existence of a single source of obligation that reaches all citizens and all laws He also discusses techniques of amelioration of punishment for conscientious lawbreakers asking how far legal systems should go to accommodate individuals who break the law for reason of conscience Drawing from numerous examples of conflicts between law and morality Greenawalt illustrates in detail the positions and predicaments of potential lawbreakers and lawmakers alike

*Ethics* Walter Henry Hill, 1884 **The Architecture of Law** Brian M. McCall, 2018-05-30 This book argues that classical natural law jurisprudence provides a superior answer to the questions What is law and How should law be made rather than those provided by legal positivism and new natural law theories What is law How should law be made Using St Thomas Aquinas s analogy of God as an architect Brian McCall argues that classical natural law jurisprudence provides an answer to these questions far superior to those provided by legal positivism or the new natural law theories The Architecture of Law explores the metaphor of law as an architectural building project with eternal law as the foundation natural law as the frame divine law as the guidance provided by the architect and human law as the provider of the defining details and ornamentation

Classical jurisprudence is presented as a synthesis of the work of the greatest minds of antiquity and the medieval period including Cicero Aristotle Gratian Augustine and Aquinas the significant texts of each receive detailed exposition in these pages Along with McCall s development of the architectural image he raises a question that becomes a running theme throughout the book To what extent does one need to know God to accept and understand natural law jurisprudence given its foundational premise that all authority comes from God The separation of the study of law from knowledge of theology and morality McCall argues only results in the impoverishment of our understanding of law He concludes that they must be reunited in order for jurisprudence to flourish This book will appeal to academics students in law philosophy and theology and to all those interested in legal or political philosophy
