Unscientific America:

Unscientific America Chris Mooney, Sheril Kirshenbaum, 2009-07-14 In his famous 1959 Rede lecture at Cambridge University the scientifically trained novelist C P Snow described science and the humanities as two cultures separated by a gulf of mutual incomprehension And the humanists had all the cultural power the low prestige of science Snow argued left Western leaders too little educated in scientific subjects that were increasingly central to world problems the elementary physics behind nuclear weapons for instance or the basics of plant science needed to feed the world s growing population Now Chris Mooney and Sheril Kirshenbaum a journalist scientist team offer an updated two cultures polemic for America in the 21st century Just as in Snow s time some of our gravest challenges climate change the energy crisis national economic competitiveness and gravest threats global pandemics nuclear proliferation have fundamentally scientific underpinnings Yet we still live in a culture that rarely takes science seriously or has it on the radar For every five hours of cable news less than a minute is devoted to science 46 percent of Americans reject evolution and think the Earth is less than 10 000 years old the number of newspapers with weekly science sections has shrunk by two thirds over the past several decades The public is polarized over climate change an issue where political party affiliation determines one s view of reality and in dangerous retreat from childhood vaccinations Meanwhile only 18 percent of Americans have even met a scientist to begin with more than half can t name a living scientist role model For this dismaying situation Mooney and Kirshenbaum don t let anyone off the hook They highlight the anti intellectual tendencies of the American public and particularly the politicians and journalists who are supposed to serve it but also challenge the scientists themselves who despite the best of intentions have often failed to communicate about their work effectively to a broad public and so have ceded their critical place in the public sphere to religious and commercial propagandists A plea for enhanced scientific literacy *Unscientific America* urges those who care about the place of science in our society to take unprecedented action We must begin to train a small army of ambassadors who can translate science s message and make it relevant to the media to politicians and to the public in the broadest sense An impassioned call to arms worthy of Snow s original manifesto this book lays the groundwork for reintegrating science into the public discourse before it s too late

Unscientific America Chris Mooney, Sheril Kirshenbaum, 2010-05 Climate change the energy crisis nuclear proliferation many of the most urgent problems of the twenty first century require scientific solutions yet America is paying less and less attention to scientists For every five hours of cable news
