## **Urban Elders:**

Urban Elders Brian Gratton, 1986-01 How has the post New Deal Era affected the aged in America This work addresses the central question that if the welfare system has tended to create the distinct circumstances of the aged rather than to react to them what prompted its development **American Indian and Alaska Native Elders** United States. Indian Health Service, 1995 Successful Aging Sheung-Tak Cheng, Iris Chi, Helene H. Fung, Lydia W. Li, Jean Woo, 2015-01-26 This book brings together state of the art research on successful aging in Asian populations and highlights how the factors that contribute to successful aging differ from those in the West It examines the differences between the Asian and Western contexts in which the aging process unfolds including cultural values lifestyles physical environments and family structures In addition it examines the question of how to add quality to longer years of life Specifically it looks at ways to promote health preserve cognition maximize functioning with social support and maintain emotional well being despite inevitable declines and losses Compared to other parts of the world Asia will age more quickly as a result of the rapid socioeconomic developments leading to rising longevity and historically low fertility rates in some countries These demographic forces in vast populations such as China are expected to make Asia the main driver of global aging in the coming decades As a result researchers professionals policymakers as well as the commercial sector in both East and West are increasingly interested in gaining a deeper understanding of aging in Asia The Collective Spirit of Aging Across Cultures Halaevalu F. Ofahengau Vakalahi, Gaynell M. Simpson, Nancy Giunta, 2014-01-28 The collective inclusive and intersectional framework used in this book speaks to the significance of understanding aging across diverse cultures from multiple perspectives but still as a shared human experience The underlying message of the book is that although we are unique and different in our aging processes we are ultimately connected through this physical mental and spiritual experience of aging Thus regardless of whether we are service providers service recipients educators or merely fellow human beings it is important that we approach the aging experience through a collective lens for discovering and sharing resources as we age honoring the past while simultaneously accepting that the future is here A few select examples of key findings from this collaborative work are as follows First despite progress in the field certain issues remain to be addressed including the challenges of racism and sexism mistreatment the digital divide poverty and other social and economic crises in urban and rural communities as they relate to our aging population Second the need for sustaining a sense of independence among the aged and interdependence among supportive systems is warranted Third our elders continue to benefit from culturally competent services community based health interventions and social services that addresses normative and emerging challenges for them Fourth spirituality in both indigenous and contemporary perspectives remains important for our elders development and quality of life

**Handbook of Asian Aging** Hyunsook Yoon, Jon Hendricks, 2018-10-26 In western countries the rising tide of population aging took 100 years to alter the face of societies but Asia is experiencing comparable changes in not much more than a

quarter of a century Contributors to The Handbook of Aging describe the magnitude of these changes and their effects on the aged and on societies attempting to adapt to the dramatic improvements in life expectancy brought on by rapid economic and social transformations Asia encompasses a vast reach from Pakistan and India to Japan the Philippines and Indonesia and in this book including Australia The Handbook of Aging provides a framework for making sense of the meeting between reverential views of the elderly and contemporary priorities as Asia arrives at the crossroads The need for innovative approaches to social policy and personal practices is nowhere more evident than in Asian countries where modern marketing economies have forced hard political choices The economic tigers of the Asian Pacific region experienced the aging of their populations ahead of other Asian countries but solutions reached during times of financial boom are being re examined as economies come back to earth with soft or hard landings The Handbook of Asian Aging provides an atlas of the far reaching changes that are afoot and that will become even more pronounced in the near future
