## Us Army In Wwii Logistical Support Volume 2:

**The U.S. Army and World War II** Judith Bellafaire, 1998 The U S Army and World War II is an anthology of selected papers from three international conferences held in 1990 1992 and 1994 on the Army s role in the war Taking the best from those meetings Judith L Bellafaire has organized the various presentations into four thematic categories prewar planning the home front the European theater and the Asian Pacific theaters reflecting the diversity of both the war and the interest of those seeking to understand its many facets In these carefully edited papers one will find the more conventional treatments of doctrine strategy and operations side by side with those focusing on military mobilization and procurement race and gender psychological warfare and large scale advice and assistance programs Despite significant changes in military technology and the geopolitical landscape of the world since those desperate times the human problems highlighted by the authors are not much different from many of those facing Army leaders today Although the past can never provide the specific recipes needed for the future experience has shown that both the basic ingredients and the manner in which they are prepared and processed have remained remarkably constant Those grappling with the challenges of stability operations and other contingency missions in support of the Global War on Terrorism will find this collection of readings invaluable **Joint Force Quarterly** ,1995 *The Logistics of War..* , **Logistical Support of the Armies, V2** Roland G. Ruppenthal, 2012-05-01 In Two Volumes Volume 1 May 1941 To September 1944 Volume 2 September 1944 To May 1945 United States Army In World War II The European Theater Of Operations United States Army Logistics Steve R. Waddell, 1994-11-30 The U S Army supply organization for the Normandy Invasion although very impressive should have done a better job in the summer of 1944 The supply system suffered from several serious shortcomings which should have been avoided The purpose of this work is to examine an aspect of military history which as many military historians have pointed out has received little attention As the Gulf War demonstrated logistics the supplying of armies is crucial to achieving victory **The Journal of Military History** ,1937 Includes scholarly articles and book reviews on topics in military history The Big 'L' National Defense University Press, 1997 **Closing with the Enemy** Michael Dale Doubler, 1994 This study picks up where D Day leaves off From Normandy through the breakout in France to the German Army s last gasp in the Battle of the Bulge Michael Doubler deals with the deadly business of war closing with the enemy fighting and winning battles taking and holding territory His study provides a reassessment of how American GIs accomplished these dangerous and costly tasks **Corps Commanders of the Bulge** Harold R. Winton, 2007 Study of the Battle of the Bulge **The Journal of Military History Cumulative Index** Henry Stover Bausum, David Bausum, 1995 *The Papers of Dwight David Eisenhower: The war years* Dwight David Eisenhower, 1970 The GI Offensive in Europe Peter R. Mansoor, 1999 The German Wehrmacht was one of the most capable fighting forces the world has ever known but in the end it was no match for the Allies Some historians contend that the Allies achieved victory through brute force and material superiority But as Peter

Mansoor argues all of the material produced by US industry was useless without trained soldiers to operate it a coherent doctrine for its use and leaders who could effectively command the formations into which it was organized

**Arsenal of World War II** Paul A. C. Koistinen, 2004 Prolific munitions production keyed America's triumph in World War II but so did the complex economic controls needed to sustain that production Artillery tanks planes ships trucks and weaponry of every kind were constantly demanded by the military and readily supplied by American business While that relationship was remarkably successful in helping the U S win the war it also raised troubling issues about wartime economies that have never been fully resolved Paul Koistinen's fourth installment of a monumental five volume series on the political economy of American warfare focuses on the mobilization of national resources for a truly global war Koistinen comprehensively analyzes all relevant aspects of the World War II economy from 1940 through 1945 describing the nation's struggle to establish effective control over industrial supply and military demand and revealing the growing partnership between the corporate community and the armed services Koistinen traces the evolution of federal agencies mobilizing for war including the National Defense Advisory Commission the Office of Production Management and the Supply Priorities and Allocation Board and then focuses on the work of the War Production Board from 1942 1945 As the war progressed the WPB and related agencies oversaw the military's supply and procurement systems stabilized the economy while financing the war closely monitored labor relations and controlled the shipping and rationing of fuel and food In chronicling American mobilization Koistinen reveals how representatives of industry and the armed services expanded upon their growing prewar ties to shape policies for harnessing the economy and how federal agencies were subsequently riven with dissension as New Deal reformers and anti New Deal corporate elements battled for control over mobilization itself As the armed services emerged as the principal customers of a command economy the military industrial nexus consolidated its power and ultimately succeeded in bending the reformers to its will The product of exhaustive archival research **Arsenal of World War II** shows that mobilization meant more than simply harnessing the economy for war it also involved struggles for power and position among a great many interest groups and ideologies Nearly two decades in the making it provides an ambitious and enormously insightful overview of the emergence of the military industrial economy one that still resonates today as America continues to wage wars around the globe

**Impact** Benjamin King, Timothy J. Kutta, 1998 It all began with a loose knit group of scientists and engineers in Weimar Germany Fixated on the idea of rocket propulsion they formed The Society for Space Travel in 1927 Some people called them dreamers who gained their inspiration from Jules Verne and the movie The Woman in the Moon Their experiments with rockets often came to naught and sometimes blew up in their inventors hands Twelve years later Adolf Hitler had plunged Germany into the most terrible war in history By mid 1944 German armies were reeling on all fronts and vast Allied bomber fleets were devastating the Third Reich while Germany had no strategic air force of its

own The Allies after their conquest of Normandy thought the war would be over by Christmas But then the German rockets appeared From the flaming continent of Europe robot bombs with one ton warheads suddenly came soaring against England These sinister weapons took no evasive action and could not be deterred by bad weather or darkness they could not be stopped unless they were destroyed This book provides rare unpublished information on the terror that fell on Antwerp and the city of Li ge in the winter of 1944 45 The rockets did not stop falling until their launch sites had been overrun by Allied troops This work provides an operational context to the Third Reich s missiles that has previously been neglected or ignored
