## **The Emergent Self:**

*The Emergent Self* William Hasker, 2015-12-18 In *The Emergent Self* William Hasker joins one of the most heated debates in analytic philosophy that over the nature of mind His provocative and clearly written book challenges physicalist views of human mental functioning and advances the concept of mind as an emergent individual Hasker begins by mounting a compelling critique of the dominant paradigm in philosophy of mind showing that contemporary forms of materialism are seriously deficient in confronting crucial aspects of experience He further holds that popular attempts to explain the workings of mind in terms of mechanistic physics cannot succeed He then criticizes the two versions of substance dualism most widely accepted today Cartesian and Thomistic and presents his own theory of emergent dualism Unlike traditional substance dualisms Hasker's theory recognizes the critical role of the brain and nervous system for mental processes It also avoids the mechanistic reductionism characteristic of recent materialism Hasker concludes by addressing the topic of survival following bodily death After demonstrating the failure of materialist views to offer a plausible and coherent account of that possibility he considers the implications of emergentism for notions of resurrection and the afterlife [The Emergent Self](#) Adrian Van Kaam, Susan Muto, Bert Van Croonenburg, 1985-01 **The Emergent Self** Adrian L. Van Kaam, Engelbert Johannes Van Croonenburg, Susan Muto, 1968 **The emergent self, book IV ; self and reality** Adrian L. Van Kaam, 1968 **The Emergent Self** Peter Philippson, 2018 This book tracks a particular understanding of self philosophically from research evidence and in its implications for psychotherapy At each step the author includes first the theory he is working from then the clinical implications of the theory followed by some links to the philosophical outlook inherent in the theory and finally a more extended case example It takes the view that the continuing self is partly an illusion partly a construct and that we in fact have to work to stay the same in the face of all the different possibilities the world offers us The author believes that we do this for two reasons First of all continuity allows deeper contact friendships loving relationships with partners and families Secondly and balancing this the predictable is less anxiety producing and that we avoid this existential anxiety by acting in a stereotyped way and avoiding some of the depths of contact He argues that this dual nature of continuing self in one context deepening contact and in another context avoiding contact has an important place in the understanding of psychotherapy Provided by publisher **Book Symposium on The Emergent Self by William Hasker** William Hasker, 2000 *Charles Taylor and the Post-Secular Imagination* Kamaruzzaman Bustamam Ahmad, 2025-10-23 In this profound philosophical work Prof Kamaruzzaman Bustamam Ahmad engages in an illuminating dialogue with the Canadian philosopher Charles Taylor exploring how moral and spiritual meaning can be rediscovered in a disenchanted world Bridging Western moral ontology and Islamic metaphysics the author interprets Taylor's thought not merely as commentary but as an active conversation

between faith reason and imagination The book follows the genealogy of the modern self from Augustine and Descartes to Rousseau and Nietzsche and culminates in a post secular vision where transcendence returns within the immanent frame of modern life Through the concepts of moral sources resonance and fullness Ahmad shows how Taylor s ideas open a path toward moral renewal in the age of technology and pluralism Charles Taylor and the Post Secular Imagination is both a work of rigorous scholarship and a contemplative meditation on how humanity can live meaningfully after the loss of sacred horizons A vital resource for readers of philosophy theology cultural studies and post secular thought this book situates Taylor alongside thinkers such as Augustine Corbin and Heidegger inviting us to re imagine the moral self as a site of illumination amid the noise of the modern age

On the Lyricism of the Mind Dana Amir,2015-12-14 On the Lyricism of the Mind Psychoanalysis and Literature explores the lyrical dimension or the lyricism of the psychic space It is not presented as an artistic disposition but rather as a universal psychic quality which enables the recovery and recuperation of the self The specific nature of human lyricism is defined as the interaction as well as the integration of two psychic modes of experience originally defined by the psychoanalyst Wilfred Bion The emergent and the continuous principles of the self Dana Amir elaborates Bion s general notion of an interaction between the emergent and the continuous principles of the self offering a discussion of the specific function of each principle and of the significance of the various types of interaction between them as the basis for mental health or pathology The author applies these theoretical notions in her analytic work by means of literary illustrations showing how the lyrical dimension may be used to teach psychoanalytic readings of literature and explore the connection between psychoanalytic and literary languages On the Lyricism of the Mind presents a new psychoanalytic understanding of the capacity to heal to grieve to love and to know using literary illustrations but also literary language in order to extract a new formulation out of the classic psychoanalytic language of Winnicott and Bion This book will appear to a wide audience to include psychoanalysts psychotherapists and art therapists It is also extremely relevant to literary scholars including students of literary criticism philosophers of language and philosophers of mind novelists poets and to the wide educated readership in general

**Dewey and the Aesthetic Unconscious** Bethany Henning,2022-03-30 John Dewey was the most celebrated and publicly engaged American philosopher in the twentieth century His naturalistic theory of experience generated new approaches to education and democracy and re grounded philosophy s search for truth in the needs of life as it is shared and lived However interpretations of Dewey after the linguistic turn have either obscured or rejected the considerable role that he gives to the non discursive dimension of experience In Dewey and the Aesthetic Unconscious The Vital Depths of Experience Bethany Henning argues that much classical American philosophy implicitly recognizes an unconscious dimension of mind that is distinct from Freud s theory Although the unconscious that emerges within American thought has never been treated systematically it found its fullest expression in Dewey s work particularly in his theory of aesthetic experience This dimension of mind illuminates the continuity between nature and culture and it

provides us with an account of why artwork is often successful at communicating meanings from the ecological and intimate dimensions of life where discourse often fails If the relationship between the human and the organic world has emerged as the definitive question of twenty first century life then the aesthetic unconscious stands as a resource for our ecological and intimate well being Perception, Action, and Cognition Snehlata Jaswal,2016-11-09 Even as simple a task as quenching thirst with a glass of water involves a sequence of perceptions and actions woven together by expectations and experience What are the myriad links between perception and action and what does cognition have to do with them Intuitively we think that perception precedes action but we also know that action moulds perception The reciprocal links between perception and action are now accepted almost universally The discovery of mirror neurons that encode observed actions has further emphasized the coupling of perception and action The real aim of this research topic is to go beyond identifying the evidence for perception action coupling and study the cognitive entities and processes that influence the perception action link For example the internal representations of perceived and produced events are created and modified through experience Yet the perception action link is considered relatively automatic To what extent is the perception action link affected by representations and their manipulations by cognitive processes Does selective attention modify the perception action coupling How and to what extent does the context provide sources of cognitive control The developmental trajectory of the perception action link and the influence of cognition at various stages of development could be another line of important evidence The responses to these and other such questions contribute to our understanding of this research area with significant implications for perception action coupling Harvard Oriental Series ,1914 *The Yoga-system of Patañjali* Patañjali,1914 **Presidential Addresses to the Society for Psychical Research, 1882-1911** Society for Psychical Research (Great Britain),Henry Sidgwick,Balfour Stewart,Arthur James Balfour,William James,William Crookes,Frederic William Henry Myers,Sir Oliver Lodge,Sir William Barrett,Charles Richet,Gerald William Balfour,Henry Arthur Smith,Andrew Lang,1912 **Proceedings of the Society for Psychical Research** Society for Psychical Research (Great Britain),1907 List of members in v 1 19 21 24 *Primer for Treating Substance Abusers* Jerome D.
