Ubiquitous Computing Systems:

Ubiquitous Computing: Design, Implementation and Usability Theng, Yin-Leng, Duh, Henry B. L., 2008-05-31 Interactive systems in the mobile ubiquitous and virtual environments are at a stage of development where designers and developers are keen to find out more about design use and usability of these systems Ubiquitous Computing Design Implementation and Usability highlights the emergent usability theories techniques tools and best practices in these environments This book shows that usable and useful systems are able to be achieved in ways that will improve usability to enhance user experiences Research on the usability issues for young children teenagers adults and the elderly is presented with different techniques for the mobile ubiquitous and virtual environments Socio-technical Design of Ubiquitous Computing Systems Klaus David, Kurt Geihs, Jan Marco Leimeister, Alexander Roßnagel, Ludger Schmidt, Gerd Stumme, Arno Wacker, 2014-07-28 By using various data inputs ubiquitous computing systems detect their current usage context automatically adapt their services to the user's situational needs and interact with other services or resources in their environment on an ad hoc basis Designing such self adaptive context aware knowledge processing systems is in itself a formidable challenge This book presents core findings from the VENUS project at the Interdisciplinary Research Center for Information System Design ITeG at Kassel University where researchers from different fields such as computer science information systems human computer interaction and law together seek to find general principles and guidelines for the design of socially aware ubiquitous computing systems To this end system usability user trust in the technology and adherence to privacy laws and regulations were treated as particularly important criteria in the context of socio technical system design During the project a comprehensive blueprint for systematic interdisciplinary software development was developed covering the particular functional and non functional design aspects of ubiquitous computing at the interface between technology and human beings The organization of the book reflects the structure of the VENUS work program After an introductory part I part II provides the groundwork for VENUS by presenting foundational results from all four disciplines involved Subsequently part III focuses on methodological research funneling the development activities into a common framework Part IV then covers the design of the demonstrators that were built in order to develop and evaluate the VENUS method Finally part V is dedicated to the evaluation phase to assess the user acceptance of the new approach and applications The presented findings are especially important for researchers in computer science information systems and human computer interaction but also for everyone working on the acceptance of new technologies in society in general *Pervasive Systems and Ubiquitous Computing* A. Genco, S. Sorce, 2010 Pervasive systems due to inexpensive wireless technology can now be implemented easily and local and network advanced applications can be joined anytime simply by using a mobile terminal cell phone PDA smartphone etc Pervasive systems free people from conventional interaction with desktop and laptop computers thereby allowing a new human environment interaction to take place on the basis of wireless multimedia communication Addressing the theoretical fundamentals of pervasive systems as

they are studied and developed in the major research laboratories Pervasive Systems and Ubiquitous Computing is aimed at MSc and PhD engineering students Ubiquitous Computing for Capture and Access Khai N. Truong, Gillian R. Hayes, 2009-03-17 Ubiquitous Computing for Capture and Access overviews the history of documentation and recording leading broadly from primitive tools into the current age of ubiquitous computing and automatic or semi automatic recording technologies Ubiquitous Computing Fundamentals John Krumm, 2018-10-08 a must read text that provides a historical lens to see how ubicomp has matured into a multidisciplinary endeavor It will be an essential reference to researchers and those who want to learn more about this evolving field From the Foreword Professor Gregory D Abowd Georgia Institute of Technology First introduced two decades ago the term ubiquitous computing is now part of the common vernacular Ubicomp as it is commonly called has grown not just quickly but broadly so as to encompass a wealth of concepts and technology that serves any number of purposes across all of human endeavor While such growth is positive the newest generation of ubicomp practitioners and researchers isolated to specific tasks are in danger of losing their sense of history and the broader perspective that has been so essential to the field s creativity and brilliance Under the guidance of John Krumm an original ubicomp pioneer Ubiquitous Computing Fundamentals brings together eleven ubiquitous computing trailblazers who each report on his or her area of expertise Starting with a historical introduction the book moves on to summarize a number of self contained topics Taking a decidedly human perspective the book includes discussion on how to observe people in their natural environments and evaluate the critical points where ubiquitous computing technologies can improve their lives Among a range of topics this book examines How to build an infrastructure that supports ubiquitous computing applications Privacy protection in systems that connect personal devices and personal information Moving from the graphical to the ubiquitous computing user interface Techniques that are revolutionizing the way we determine a person s location and understand other sensor measurements While we needn t become expert in every sub discipline of ubicomp it is necessary that we appreciate all the perspectives that make up the field and understand how our work can influence and be influenced by those perspectives This is important if we are to encourage future generations to be as successfully innovative as the field s originators **Ubiquitous Computing Systems** Hitomi Murakami, Hideyuki Nakashima, Hideyuki Tokuda, Michiaki Yasumura, 2005-07-20 This book is a collection of papers presented at UCS 2004 held on November 8 9 in Tokyo UCS is a series of international symposia sponsored by the special interest group Ubiquitous Computing Systems of the Information Processing Society of Japan The rst UCS was held on November 17 2003 in Kyoto It was held as an invitation based symposium UCS 2004 was the second of the series and the rst submission based conference UCS focuses on the emerging research area of ubiquitous computing systems This emergence is an outcome of the rapid evolution in smart appliances and devices as well as tremendous advances in wireless networks and mobile computing In the last few years various applications of information technology have been changing our everyday life rapidly and to a large extent The best ex
