Who Pays for Universal Service? Robert W. Crandall, Leonard Waverman, 2010-12-01 In virtually every country the price of residential access to the telephone network is kept low and cross subsidized by business services long distance calling and various other telephone services This pricing practice is widely defended as necessary to promote universal service but Crandall and Waverman show that it has little effect on telephone subscriptions while it has major harmful effects on the value of all telephone service The higher prices for long distance calls reduce calling shift the burden

of paying for the network to those whose social networks are widely dispersed Therefore many poor and rural households the intended beneficiaries of the pricing strategy are forced to pay far more for telephone service than they would if prices reflected the cost of service Despite these burdens Congress has extended the subsidies to advanced services for schools libraries and rural health facilities Crandall and Waverman show that other regulated utilities are not burdened with similarly inefficient cross subsidy schemes yet universality of water natural gas and electricity service is achieved As local telephone service competition develops in the wake of the 1996 Telecommunications Act the universal service subsidy system will have to change Subsidies will have to be paid from taxes on telecom services and paid directly to carriers or subscribers Crandall and Waverman show that an intrastate tax designed to pay for each state s subsidized subscriptions is far less costly to the economy than an interstate tax Robert W Crandall is a senior fellow in Economic Studies at the Brookings Institution Leonard Waverman is a visiting professor at the London Business School on leave from the University of Toronto They are coauthors of *Talk Is Cheap The Promise of Regulatory Reform in North American Telecommunications* Brookings 1995 *Managing the Human Side of Information Technology* Edward Szewczak, Coral Snodgrass, 2003-01-01 Strategies for effectively managing how information technology impacts human and organizational behavior are discussed in this business guide Covering both the soft and hard dimensions of organizational development information is provided on e communication virtual teams and action learning A framework for increasing crosscultural efficiency and the global economy engagement is provided **Universal Access in Human-Computer Interaction.
