Universe Within:

The Universe Within Neil Shubin, 2013-01-08 In The Universe Within Neil Shubin one of the world's leading experts reveals to us the extraordinary cosmic and evolutionary adventure of our own bodies. During the past 13.7 billion years or so since the Big Bang, our universe has evolved: stars have formed and died, and our planet congealed from the matter in space. For aeons, the earth has circled the sun while mountains, seas, and entire continents have come and gone. Against this epic backdrop, humanity's place in the cosmos can look tiny and insignificant. But as Neil Shubin shows in this revelatory new book, the one place where universe, solar system, and planet merge is inside your body. Shubin shows how the origin of the Moon is tied to our internal body clocks, how the vast amounts of water on Earth and inside all living creatures crossed the deepest stretches of space to us, how strange fluctuations in the orbits within our solar system have led to our irregular ice ages, and how tiny imbalances in the chaos immediately after the Big Bang can explain why matter exists at all. Delving below the earth's surface and into the frozen Arctic, exploring the smallest atomic structures and the vast reaches of space, Neil Shubin uncovers a sublimely beautiful, almost magical truth that in every one of us lies the most profound story of all: how we and our world came to be. Shubin is not only a distinguished scientist but a wonderfully lucid and elegant writer; he is an irrepressibly enthusiastic teacher, a science writer of the first rank. Oliver Sacks, Neil Shubin is a palaeontologist in the great tradition of his mentors Ernst Mayr and Stephen Jay Gould. He has discovered fossils around the world that have changed the way we think about many of the key transitions in evolution and has pioneered a new synthesis of expeditionary palaeontology, developmental genetics, and genomics. He trained at Columbia, Harvard, and Berkeley and is currently a Professor in the Department of Organismal Biology and Anatomy at the University of Chicago. His previous book is Your Inner Fish: The amazing discovery of our 375 million year old ancestor. The Game Terence J Henley, 2014-06-10 THE GAME happens inside a very large Hadron Collider which is built by the Utopians, Godisious, and Luciferious to find the answer to a problem their people have. The Cycloves are a very dangerous species intent on killing everyone and destroying every planet they come into contact with. Having destroyed one galaxy, they are now on route to the Utopians' galaxy. Needing an answer as soon as possible, how they can accomplish this, they make a new multiverse inside the Hadron Collider that is in orbit above their moon. The Hadron Collider holds a number of universes, thousands of galaxies, and millions of stars and planets. Everything within the Collider is very small, but the species that live inside it have no idea. The Cycloves are put at the top of the Collider, and the humans lower down. The people from Utopia Prime enter The Game to take control of the units within it and get them to fight the Cycloves. The main two characters, Darrent and Chrymella, who are inside The Game, have to work together to find the answer before the Cycloves return and destroy the Utopians and everyone else in their galaxy. When Darrent finds himself occupying Chrymella's body, he is not happy and wonders how he can do his job.
