Levin,1977      **The Urban Prospect** Lester Russell Brown,1976      Cityscape ,1996      Design for Social Diversity Emily Talen,Sungduck Lee,2018-03-13 The most successful urban communities are very often those that are the most diverse in terms of income age family structure and ethnicity and yet poor urban design and planning can stifle the very diversity that makes communities successful Just as poor urban design can lead to sterile monoculture successful planning can support the conditions needed for diverse communities This new edition addresses the physical requirements of socially diverse neighborhoods Using the city of Chicago and its surrounding suburban areas as a case study the authors investigate whether social diversity is related to particular patterns and structures found within the urban built environment Design for Social Diversity provides urban designers and architects with design strategies and tools to ensure that their work sustains and nurtures social diversity      Italo Calvino's Architecture of Lightness Letizia Modena,2011-05-09 This study recovers Italo Calvino s central place in a lost history of interdisciplinary thought politics and literary philosophy in the 1960s Drawing on his letters essays critical reviews and fiction as well as a wide range of works primarily urban planning and design theory and history circulating among his primary interlocutors this book takes as its point of departure a sweeping reinterpretation of Invisible Cities Passages from Calvino s most famous novel routinely appear as aphorisms in calendars posters and the popular literature of inspiration and self help reducing the novel to vague abstractions and totalizing wisdom about thinking outside the box The shadow of postmodern studies has had a similarly diminishing effect on this text rendering up an accomplished but ultimately apolitical novelistic experimentation in endless deconstructive deferrals the shiny surfaces of play and the ultimately rigged game of self referentiality In contrast this study draws on an archive of untranslated Italian and French language materials on urban planning architecture and utopian architecture to argue that Calvino s novel in fact introduces readers to the material history of urban renewal in Italy France and the U S in the 1960s as well as the multidisciplinary core of cultural life in that decade the complex and continuous interplay among novelists and architects scientists and artists literary historians and visual studies scholars His last love poem for the dying city was in fact profoundly engaged deeply committed to the ethical dimensions of both architecture and lived experience in the spaces of modernity as well as the resistant practices of reading and utopian imagining that his urban studies in turn inspired
